2021 JSCOMPANY CATALOG

JSCOMPANY pursues that you,
nature, fish, and the world
become CONNECT naturally
through the FISHING genre!

Connect by Fishing

JScompany **connects people by fishing!**

Anyone who loves fishing around the world is aiming to move to a wide world with a wide sea, river, and nature. We are extremely happy to be able to share fishing stories and people's lives with you with the pride of Korean Rod brand. In 2021, staff and all employees will try to become Korea's No. 1 company that constantly challenges and grows together to become a JScompany that listens to the voices of many fishing lovers and understands their hearts.

PROCESS & DEVELOPMENT SYSTEM

JScCompany's Product Development Process and Advanced Systems

JScCompany introduced a state-of-the-art process focusing on the design and handling of composite materials, the most important material in the production. The process of innovative rod blank development and production is carried out as a one-stop process.

We are supplying products that combine the best performance and design that consumers want using long-term know-how and data. Let me introduce the world's most competitive product development system and process of JScCompany.

1 Computer-controlled molding system

2 3D Design Process

3 3D Printing Process

4 Blank Load Test

5 Fishing rod sensitivity test

6 Fishing Simulation

7 Fishing rod strength test

SPECIAL TECHNOLOGY of JSCOMPANY

JScCompany's special technology

JScCompany's experts from various fields worked head-to-head to create a special and proud fishing rod. As a result, we developed our own and diverse technologies and applied them to our products. We will make more efforts to develop products that can show the best performance based on our accumulated technology. We unveil the special and diverse technology of JScCompany that the world-recognized technology.

Combines Helical Core and 3D CLOTH-structure, it condenses the omnidirectional force to increase torsional rigidity and improve shape restoration.

An ultra-high elastic four-axis Helix Nano is coupled to the helical core structure (two-axis). Minimizing the loss of force and realizing an even distribution of force in the vertical, horizontal, front, rear, and inclined directions. Casting power becomes accurate, torque increases, and manipulation becomes possible as desired.

It is a structure in which scream carbon fiber and 3D CLOTH are combined in the 90° direction. By reinforcing the transverse strength, it is possible to make a high-density rod blank with excellent bending stress.

It is a structure that minimizes the distortion of the BACK BONE phenomenon, which is a disadvantage of the stacked structure of composite materials. It is a state-of-the-art method that increases instantaneous power and enables accurate casting and precise operation of fishing rods by applying uniform stress to all points of BLANK.

The X-WEAVE method is a X-shaped carbon tape wrapped on the surface by minimizing the interval. Increased torsional stiffness enables accurate casting and creates uniform stress, enabling precise manipulation.

The high compression molding process combines the inner cores of carbon fibers at the same time to align and compress high density. It is a high-tech method that greatly reduces the weight and diameter of the rod blank and improves the performance of the rod. Casting vibration is reduced, so casting ability is accurate.

Helix Super Nano Material is JScCompany's own technology to cope with external stress and compression resistance inside the curve, which causes a highly rigid epoxy resin system. The combination technology of helical core and nanometrics is the only and best existing technology that can manufacture stronger and lighter.

Compensate for the disconnection of the fastening area, which is the weakness of the existing joint. It realizes smooth bending, and improves power and sensitivity.

Rolling press methods often cause layer separation and spine problems. To solve the problem, the surface of the material was high-pressure taped with carbon yarn.

The blank applying the carbon tape winding method of construction to the one-way fiber. The density of the laminating structure is enhanced and the force of restitution and bending strength of fishing rod are improved.

HELIX GRAPHENE MECHANISM

Effect of Helix Graphene Mechanism

The graphene-added carbon fiber fabric developed by JScCompany is a chemical bond of graphene and carbon fiber dispersed in epoxy resin. This increases the bonding strength between the fiber and the resin, and reinforces the rigidity of the fabric by matching the directions between the graphene and the carbon fiber. As a [advanced composite material] that increases the breaking strength of fishing rods by strengthening resistance to cracks due to entanglement between graphene chains, we applied it to the fishing rod to reduce the weight of the material by 7% and improve the fracture strength by 10% to realize a light and strong fishing rod. In addition, we were able to get the result of doubling performance and strength by combining with Nano technology.

S-2 GLASS MATERIAL FEATURES

Characteristics of S-2 Glass New Materials in JScompany

The **S-2 GLASS** has the best mechanical properties among glass fibers; **Stiffness is 22%** greater than the E GLASS commonly used in fishing rods. Tensile strength and **Elongation are 68% and 19% higher**. the **weight is 4%** lighter. Therefore, S-2 GLASS can be used to create a lighter, harder fishing rod than E GLASS. Especially, when mixing with CARBON, **flexibility which is a disadvantage is supplemented, and a stronger fishing rod can be manufactured.**

Complemented the shortcomings E GLASS and CARBON!
S-2 GLASS

In JSCOMPANY, the light weight, high stiffness and high strength properties of **S-2 GLASS** were used. We are working to develop products that meet the various needs of consumers' taste and durability at the same time by mixing **S-2 GLASS** alone or **S-2 GLASS and C S-2 CARBON**

*Connecting with
Green nature*

Lightly and gently, **connected with the green nature!**

A time to feel the moment of being one with nature and communicating with nature beyond just catching the target fish.
JS Company introduces a genuine product for anglers who love freshwater fishing!

Since the launch of BIXOD, which has made a breakthrough in the history of the Korean rod in 2011, BIXOD has continued to produce several versions while maintaining and developing its own identity. BIXOD, which has been introducing advanced technology and amazing designs every time it launches a new version, is now preparing to reach the peak of all of it.

BLANK Material :
40~46TON ultra-high elastic carbon + HELIX SNM 1500 + HEXA CROSS method
EQUIPMENT :
Guide : FUJI TITANIUM TORZITE "KR" Guide
Spinning reel seat : FUJI TVSTK16
Integrated reel seat : JSCOMPANY SYNAPSE TECHNOLOGY WOVEN 3K Carbon grip
AIR VIBRATION SYSTEM End cap

New method : Integrated reel seat - Synapse Technology
Synapses are biological terms that transmit neuronal signals from neurons, and most of the sensations we feel are transmitted through this synaptic gap. In this regard, we named the integrated Reel seat as Synapse Technology, which means accept the vibration delivered to the rod as the best state. Synapse Technology with perfect grip has two great advantages over conventional rods:

Sensitivity
Synapse Technology delivers a perfect grip and undistorted sensitivity by integrating three things: trigger, reel seat, and grip.

Grip
Synapse Technology has conducted more than two years of field tests and dozens of mold modifications. As a result, no matter what gripping method is used, it provides a perfect grip for Asians with small hands. The part where the little finger touches is thickly processed and comfort is realized.

Carbon grip and air vibration end cap
The vibration delivered from the tip of the rod leads to the carbon grip on an integrated reel seat, and the vibration meets the air vibration system more effectively and comes to the user with a single loud vibrate. The first integrated air vibration end cap in Korea has been adopted, which has the effect of further amplifying sensitivity with beautiful appearance.

High Strength Blanks Made by Biaxial + 4-axis Carbon
We used the biaxial helical core method that our company boasts and finished with the four-axis reinforcement method which is most commonly used in the current high-end rod. The combination of the inner two-axis and the outer four-axis reacts flexibly wherever the impact is applied, meeting with the self-developed Helix 1500 prepreg and making it stronger than any other rod. Unsanded blanks reminiscent of muscle are approaching with a sharp metal-like feeling, and the repulsive power due to external influence is also very good, which gives pleasure to fishing.

Simple is Best
The design is completed with beautiful curves, simple gradation, and metal decoration that is a point rather than the straight and colorful designs of existing flagship rods. The design identity of BIXOD N B5 has been realized: Simple is Best; this is the orientation of a new flagship design put forward by BIXOD N B5.

Integrated reel seat(Synapse Technology)

S68L-ML | S682L-ML

- Bottom fishing-specific special models (fitted to the trend of long rods)
- All-in-One products that also digest light weight fishing gear of around 3g (Down Shot Rig, Neko Rig, small rubber jig)
- L-ML, a Rod power design that didn't exist before. (Tip: Stronger than the existing L Power, Responding flexibly to Big-Bass, Butt: Outperforming the existing ML Power)
- Optimization for 6lb carbon line Small caliber torzite array, long distance and errorless pinpoint casting
- The adoption of FUJI's TVS Reel seat, used in Mountain streams; light weight, operability, and exposed blanks, are excellent in sensitivity.
- The integrated carbon grip is adopted (easy to read floor conditions with fine sensitivity, beautiful design)

BC69M | BC672M

- Standards for the N B5 Bait series (excellent balance and non-metal use); M class (6.9ft, power-overloading, longcasting-capable of existing Rod MH)
- More than two years of harsh testing in the tournament (The rod has remarkable performance using bottom fishing gear such as Texas Rig, Free Rig, Down Shot Rig as the main. The allowable fishing gear is more diverse than the existing Rod M power.)
- Set best for 10 to 14 lb carbon lines (Focusing on manipulation and casting; one-handed manipulating, adopting small caliber torzite guides)

BC611MH | BC692MH

- Specialist special in heavy weight bottom fishing gear (rubber jig and Texas Rig, Free Jig, Heavy-Down Shot, Heavy-Neko Rig and others to overpower Bass)
- Tip design for casting with around 10g of gear (excellent Rod H power, casting performance and hookset success rate)
- Optimization for bait cast reels of less than 200g (Manipulation and hook set are facilitated with grip length suitable for Koreans)
- Set to fit 12 to 16 lb carbon lines (Adopting a small caliber torzite guide, easy line control)

BC72H

- Start with a cover, finish with a cover (Outstanding Power in Heavy Cover)
- Special balance design (intentional balance setting for effective manipulation of the blank's front center of gravity design, hook set success rate increase, and 2oz heavy lure)
- Set as FAST action (EX-FAST's initial responsiveness and ease of casting)
- Specialized in rubber jig, heavy-Texas rig, punch rig, etc. (Best match for cover buzzing and Frogging)
- 16~20 lb carbon lines, 30~40 lb PE lines setting (with a small caliber guide, easy line control)

FUJI TVSTK16 INTEGRATED REEL SEAT

FUJI TITANIUM TORZITE "KR" GUIDE

Package: 1pc (high-end interlock cushion jacket packaging), 2pc (hardcase) | Origin: South Korea

BIXOD B4

Is there a strong, soft material?
Is there a light and tough material?
Can we have a light but long-lasting action?

To implement all of these conflicting properties, the BIXOD "N" series used state-of-the-art design mechanisms using the finest composites. The helical core structure applied inside and outside the blank maximizes the characteristics of the material while binding the opposite materials together. The internal ultra-elastic 65-ton and 46-ton SHEET maximizes strong and cheerfulness and realizes ultra-high sensitivity that can be clearly felt from a long distance.

High-quality cork grips imported and processed directly from Portugal are designed to fit the hands of Koreans to enhance grip feeling and become one with the body. The light and strong mechanism of the BIXOD brand is completed in design from "N" and reveals a strong and simple sense using two-tone aluminum anodizing. The reel seat with the aurora ion plating technique increases grip and transmits the vibration

of the blank without attenuating it.

BIXOD "N" rod has another material speciality. It is in a blank with a six-axis structure. The carbon sheet was used in four directions by longitudinal, transverse, and cross (45, 135 degrees) on the surface of the blank. As a result, the blank appropriately corresponds to any stress: bending, twisting, tension, compression. By increasing the torque as much as possible, we were able to create a very ideal type of blank that could always win the fight against fish by increasing the power and intensity of the blank. We built a top-class image with a Fuji "K" guide equipped with a light and unchanged titanium frame. The guide's size and balance are combined with a taper to properly distribute and list to increase the casting distance, increase Bottom and Bite sensitivity, and distribute the power appropriately to make the blank's condition the best.

S64UL

- A thin soft tip and meticulous power Butt
- Blank, which uses helical core and hexacross, attracts pressured- fish with a strong hookset and soft power with brilliant action.
- Excellent ability to operate in mid-rolling such as Jig Head, Neko, and Wacky.
- Excellent operability of small plugs and finishe fishing

S67L

- Fast Taper: Soft and powerful blank, strong tips and butt. The dense "Helix SNM blank is more resonant than the normal blank, delivering excellent sensitivity, enabling delicate Finesse Fishing
- Excellent in the brilliant action-direction of Jig Head, Neko, Kaiser and Wacky Gear, Designed to suit all the Finishes fishing: Wacky, No Sinker, Down Shot and more

S69ML

- Spinning rod, but Bait rod's power, talk, long casting, hookset ability
- "SNM" Blank delivers the sensitivity of tips. The most common Rod to operate all warm lure, small minnow, and spinnerbait in detail at 1/8-3/8 oz
- Momentary power and high torque that can bring excellent range. Strong Butt Power to Make a Perfect Hook Set for a Long-distance Bite

BC66ML

- Moderate Fast Taper: Soft and strong blanks with helical core and hexacross structures are suitable for long-term tweaking, Jerking, and casting
- Minnow, Topwater is available. Natural Hook set is possible, such as jighead dragging or Texas retrieve of Softbait
- Titanium "K" Double-foot Guide PE Line twists and break prevention at the momentary Hook set; maximizing distance)
- It prevents breakage of carbon fibers that may occur during long-term use. (Good for using high weight bait)

BC67M

- Fast Taper: The most widely used general-purpose Rod with both the power of the Bait rod and the delicateness of the spinning rod.
- Soft tips: shallow crankbait, jerkbait, light-weight spinnerbait, softbait Gear (Jighead, Wacky, Neko) available.
- Light Drop shot rig, Texas rig and other various lures can be dealt with

BC610MH

- Fast Taper: It's a general-purpose rod that Bass anglers must have at least one. High-density blanks have a feeling of metal and ultra-high sensitivity. (Best advantage for bottom fishing)
- Riverbed shape, and fine Bite can be detected. Powerful hookset capabilities from long levers
- Breakthrough Range: Down Shot Rig, Texas Rig, Rubber jig, etc. Powerful torque even in buzzing fishing using high-weight swimbait

BC74XH

- Rod with powerful torque, operability and high sensitivity Advantageous for Big Bass games
- Operations include a swim bait, big bait, Frog, and Punch Rig within 4oz Alabama Rig is also available

BC68MH

- "SNM" Blank's power and torque allow instantaneous reactions. By combining the hexacross structure, the casting distance is increased to overcome the disadvantages of wire bait
- High elasticity sensitivity is delivered to improve the sensitivity of the bite excellently.
- High sensitivity and fast reaction rate from Moderate-Fast taper maximize the crackbait Wobbling and search capability of the middle range

BC71H

- Fast Taper: Powerful performance to easily suppress and catch any obstacle
- The rod, equipped with Helix SNM, was lightweight and manipulative enough to be able to fish for a long time such as tournament.

NEW

BIXOD N B3 -Ver.2-

BLANK :
 40~46TON High elasticity CARBON + Helix graphene + Helical core + 5DS CROSS (BC682M-R, BC7102MH-R, BC682XH-H: + S2 GLASS)
FUJI GUIDE : Titanium "KR" Concept SIC GUIDE
SPINNING REEL SEAT : JSCOMPANY's NEW Spinning REEL SEAT
BAIT REEL SEAT : JSCOMPANY's NEW baitcasting REEL SEAT
REEL SEAT COLOR Spray
GRIP : Three concept grips (1. "AAA" Class CORK GRIP / 2. BLACK rigid EVA GRIP / 3. Octagonal CARBON GRIP) Octagonal
CARBON GRIP : Anti-skid RUBBER Spray
AL BUTT CAP : Aluminum Application of Air Vibration System for Improving Sensitivity Bite Graphene Hexagonal Cutting Process

Spinning split handle | Self-designed "NEW SPINNING REEL SEAT"

Bait split handle | Self-designed "NEW BAIT REEL SEAT"

Cork full grip

S672UL-L

- A spinning model that can induce Bite with light lure without heterogeneity. Excellent for mid strolling and small rubber jig operations. (Available for a variety of Rigs, including Neko, Dropshot, etc)

S682L-ML | S68L-ML(1피스)

- All Rigs on the Spinning tackle can be operated professionally. Especially Wacky, Drop shot, and Neko Rig

S702ML-M

- It deals with heavy spinning tackles: from deep dam depths to general depths of water
- Strong power and strong torque. Stable landing is possible

BC702ML

- Universal Bait rod : Hardbait's Delicacy & Softbait's meticulousness. Good for boating and walking fishing with excellent distance
- Excellent for lightweight Rig operation such as Light Free and Small rubber

BC692M-X

- Bottom fishing rod specialized in the typical 1/4 to 3/8oz Jig
- Maximum Bite sensitivity, Overwhelming distance

BC712MH | BC70MH(1 piece)

- The most common model Bottom fishing using free, downshot, Texas, and rubber jig, as well as Hardbait operation based on 7:3 action

BC702MH-X

- You can react sensitively to extreme bottom fishing. Based on the 9:1 action, you can feel the sensitivity of the extreme
- UnderRig, including Free, Downshot, and Rubber, is professionally operated

BC722H-X

- 8:2 action, bottom fishing model that maximizes sensitivity. Specialized in Under Rig use, such as Heavy Free, Punch, Texas, etc

BC732H

- The universal specification of the 7:3 action. All-weather and all-round specs that can run from the Harvey Free Rig to the Light Big bait Buzzing
- Great Butt Power and Flexible Action

BC682M-R

- The hardbait operation of 6:4 action is used professionally. Operate crankbait, minnow, spinnerbait, etc. A specialized model that can lead to stable landing

BC682XH-H

- Based on the 6:4 action blank, large hardbaits from big-bait to punching and large-swimbait are professionally operated
- A professional specialized model that eliminates heterogeneity as much as possible and shows stable taper
- It has the specifications suitable for running various big-baits

BC7102MH-R

- Lure (Spinnerbait, Top water, Swimbait, etc) and Hardbaits (Deep crank, Minnow, etc) can be operated professionally
- Long, flexible Tips show natural hooking-landing

INFORMATION | Some of the specs may be changed because the test is currently underway.

BIXOD AIR

Lighter and lighter.
HELIX SNP + GRAPHENE
BIXOD N AIR.

Weight, strength, and sensitivity, the three factors that determine the completeness of the fishing rod. A product that satisfies all three factors has been born. Blank, which blends graphene into HELIX SNM, boasts guaranteed strength and ultralight. In addition, the high-density Blank maximizes the vibration width along with the air vibration system, giving the sensitivity that was not before.

Practical design considering the operability of the Bass rod; employing full cork grips to reflect consumer needs; and nevertheless, it succeeded in developing ultra-light rods. With 7.5:2.5 tapers reflecting the trend, you can feel the repulsive power of graphene when casting. During landing, you can control the rod with torque from thin blanks and ideal taper

The highest satisfaction during the three-year test period. Light weight, ideal balance, accurate information delivery ability. I pride myself on being the most advanced BIXOD Rod series that has shown what to do for Angler."

JSCOMPANY pro-staff, Korea Sportfishing Association Ryu Yeong-ju Pro

BLANK Material:
40TON High elasticity CARBON + HELIX SNM Graphene Helical core + SHD
FUJI GUIDE : Titanium "KR" Concept SIC GUIDE

S652UL-L

- Ultralight Rod specialized in ultralight jigs of 1/32oz Excellent to operate Finesse Gear, including midstrolling

BC672M

- Excellent for lure operations in the Zig-Minnow family of 1/4~3/8oz. Basic Model of Baitcast Rod

S672L-ML

- Spinning models that can operate most lightweight Gears, including Neko, Kaiser and Jighead, at 1/16~1/8oz. Easy manipulation and suppression with delicately reacting tips and strong Butt power

BC692MH

- It is excellent for Jig, Wire bait lure operation of 3/8~1/2oz. It boasts strong Butt power and overwhelming sensitivity

BC702H

- Excellent for Jig and Frog operations over 1/2oz. The ultra-light blanks blended with helix SNM and graphene give incredible torque

BC702ML (베이트 피네스)

- Excellent for Bait finesse jig and light weight Minnow series of Lure operation at 1/8~1/4oz

BIXOD B2

Lighter
Stronger
THE BIXOD B2

"Light and strong." With the launch of 2011, the BIXOD B2 bass rod, which was the standard for bass rods, changed everything. We have a lineup of functional and design-specific specifications to satisfy intermediate users who understand Bass fishing and can use various techniques freely

In addition, the combination of high-sensitivity touch type reel seat and asymmetric cork grips of ergonomic design, which are first introduced in Korea, guarantees comfort-grip and usability that have not been felt before

BLANK material:
30~40TON BASE + HELICAL CORE CONSTRUCTION
FUJI Guide : FUJI "KR" Concept SIC GUIDE
SPINNING Reel seat : Latest touch TYPE REEL SEAT (ALPS)
BAIT Reel seat : Latest Touch TYPE REEL SEAT (ALPS)
Reel seat COLOR : 2TON COLOR Spray (RED / BLACK)
SPINNING GRIP : "AAA" Class CORK GRIP
BAIT GRIP : "AAA" Class Full CORK GRIP

BC592M (VERSATILE HANDLE SEPARATION TYPE)

- Rods that can be used universally in balley boats or kayak fishing. Designed with a short, repulsive force that is as free as possible from obstacle constraints. You can freely cast one hand casting, pitching, skipping, etc., and cast it accurately at the desired point.

BC672M (VERSATILE)

- Rod with the action of M power which is the standard of Bait. Designed to operate from delicate Gears such as No sinker to Gears of 10g or more. Touch Type Reel Seat, Sharp Butt, Smart Landing

BC692MH (WORM & JIG)

- Rod adapts well to various field changes during the four seasons of Korea. Strong Butt, touch-type Reel seat. The riverbed structure and fine Bite can be detected during long cast and dragging. Design to operate high-weight Gear in all weather.

BC712H (WORM & JIG)

- It escapes the dull and heavy feature of the conventional heavy Rod and it lights and it strong. It is easy to suppress obstacles in any heavy cover. Buzzing, Rubber, and Punch Rig can be used for accurate hookset and fast landing

BC742XH (BIG BAIT & BUZZING)

- Hardcore torque and power that can be landed in any heavy cover. Extra Heavy, but not rugged. Flexible casting is possible. Big bait, Buzzing, SwimBait, Alabama Rig available for more than an ounce

S632UL-L, S65UL-L (LIGHT PERFORMANCE)

- Slim, soft, but not weak. It has a flexible tip that responds immediately to delicate movements. Complementing tremors during casting, which is a disadvantage of flexible rods, and designing Butt to favor hooksets.

S672L-ML, S67L-ML (LIGHT PERFORMANCE)

- Sharp blanks that react immediately to a jig Gear of about 1/8oz. Designed to perform all-weather fishing with ML butt action. Delicate Pin spot operation of the hardbait is possible.

BC662ML (HARD BAIT)

- Mod-Fast type hardbait-only rod. A flexible Tip Top delivers the correct action to the far cast Lure. Helical Core Butt with strong pressure.

BC762XXH (SUPER POWER FISHING HANDLE SEPARATION)

- It is designed strongly for heavy cover field enthusiasts to operate under bad conditions. A handle detachable model capable of snakehead fishing through lure operation and frogging of 2oz or more.

BC66L-ML (LIGHT PERFORMANCE)

- Designed to allow a bait casting of light jigs of 7g or less. Focused on small Jigs including Micro Rubber, Kaiser, Neko, Jighead and more. Designed for a Surf Casting Reel of less than 150g, which is released these days.

BC67M-MH (WORM & JIG)

- A reference model for the Bait one-piece Rod. A wide range of operations are available, including the characteristics of existing MHs in a typical M spec. Designed slightly more flexible and smooth than conventional MH.

BC69MH-H (WORM & JIG)

- A model specialised in high-weight Gear with MH Tip and H Butt. Flexibly cope with seasonally changing fields. Operable with Bottom fishing and high weight Jig and spinnerbait.

BIXOD B1 2021

New challenges.
B1 has returned with a lighter weight.

Since its launch in 2011, the BIXOD Bass Rod series, which has received full support from Bass angler, has been released as an entry model to repay your love. The technique and lure of Bass fishing are more diverse and more advanced than any other genre. In order to resolve the thirst of anglers, we have expanded the range of choices by applying various patterns of blanks and matching combinations patterns.

BLANK material
40TON High Elastic Carbon + Helical Core Method + X WEAVE
FUJI Guide : FUJI ALCONITE "KR" Guide SPINNING
Reel seat : FUJI VSS16 + KDPS16P/ASHBAIT
Reel seat : FUJI PTSMPK17Portuguese cork grip application Blank with three concepts. (Three in one Be One)

Type-F

- 7:3 Fast Center Cut Footover Combination
- Special rod blank that reflects the identity that has been going on since the initial BIXOD Bass rod series. It has a sharp waist and soft tip that plays an optimal role in various fishing environments.

S652UL

- Suitable for the shaking action of the small jig Gear including midstrolling. Delicate, soft tips, Easy to cast a light luer from a distance. Flexible Butt that doesn't miss hooked targets. Even with 3~4 lb thin line, it is easy to suppress the powerful target
- Use : *midstrolling, small jigs, etc*

S662L

- The most common spinning model. The most ideal choice for fishing with just one rod
- Use : *Neco, Wacky, Small Hardbait, etc*

BC682M

- Standard of Rod of M PowerSoft tips reduce foreign body sensation to the target, and with delicate operability, they are excellent for software as well as hardbait (Jerk, Shallow crankbait) operation
- Use : *Free rig, Dropshot, Jerk, Shallow crankbait and more*

BC692MH

- The most general model of the Bait casting. The most ideal choice for fishing with just one rod
- Use : *Free Rig, 1/2oz of wire bait, etc*

BC712H

- It most flexibly deals with the various field situation. Excellent for heavy lure operations around 1oz
- Use : *Jig, wire bait, buzzing, swim bait and etc. around 1oz*

Type-X

- 8:2 EX-Fast Center Cut Foot-in Combination
- A strong and fast blank was needed. The most preferred Gear by K-anglers is a combination of sinkers and worms such as Free Rig. Powerful hookset performance, light and sensitive blank. The center cut foot-in combination method. Complete a powerful butt power that is light and untwisted. It shows the unique performance of the worm & jig exclusive Rod

S692ML-X

- Powerful Spinning Models that are essential for harsh field situations
- Longcasting and powerful hooksets are possible at close to 7ft long. It had a light weight and delicate operability
- Use : *Bait tackles from Jig, Dropshot, Wacky and others*

BC702M-X

- With special design and balance adjustment, the worm & jig exclusive rod boasts the high sensitivity and powerful Butt needed in Bottom fishing
- Delicacy and powerful force that connects even fine Bite to a Hook set
- Use : *Free rig, Texas, drop shots, jigs, bait Neco and more*

BC712MH-X

- A worm & jig-only rod based on light weight and strong Butt. Using all worm gears, including Free, Texas, Heavy Dropshots, and Rubber, with a Sinker around 14g. Excellent sensitivity, best hook set performance
- Use : *Jigs, Free Rigs, Texas Rig, etc., around 1/2oz*

BC722H-X

- Power Fishing, which requires strong pressure on heavy cover, boasts excellent performance (Texas Rig, Punch, Frog)
- Not only the light weight, but also the delicate operability that was not seen in the H Power Rod
- Use : *Jig, Texas Rig, Frog, etc, around 1oz*

Type-R

- 6:4 Mod-Fast(Regular) 6:4 Cut Foot-in Combination
- Butt is flexible, Tip is strongly designed to suit fast moving fishing. Soft Butt helps you easily with repetitive casting, and strong Tip can manipulate Lure at will. It is suitable for the fast fishing style focusing on the powerful performance

BC652M-R

- Top water, stick bait, Long Bill, short bill jerk bait around 1/2oz requiring fast and accurate action. Fast moving models such as slipless crankbait, metal vibe, chatterbait, etc. that require long-distance casting and colorful action
- Use : *Top water, Stick, Jerk, Spinner, Chatter bait and more around 1/2oz*

스피닝

배트

BC6102MH-R

- From tips to Butt, it has flexible but powerful torque. Excellent for fast moving fishing using more than 1/2oz spinner · chatterbait etc
- It can easily handle the high weight lure more than 1oz which was difficult to operate in MH power
- Use : *Spinner, chatterbait more than 1/2oz, swimbait, top water etc more than 1oz*

BC742H-R

- A special Rod that can handle even the 3oz-class lure that seemed impossible in H Power with Double-foot Guide adoption and special blank design
- Use : *Heavy Spinner bait over 1 oz, Alabama, Big, Swim bait etc. over 2oz*

Package: High quality Hardcases | A/S: 2 absolute rules apply for 6:4 cut | Origin: South Korea

Sports fishing is a dynamic genre, especially walking games. Find points that might have a target, and inspire vitality to the throw-in Lure. Fishing where all actions flow according to my will. It is the ideal of NIXX DX to pursue this dynamic fishing style.

- BLANK Materials :** High elastic pure carbon (30t + 40t)
- Increase the density of carbon fibers to increase lightness and power
 - Blank mechanism :
 - ZCT CONSTRUCTION (carbon tape winding)
 - SHD (Super micro High Density carbon) method
- EQUIPMENT :**
- Hard GREY E.V.A Grip
 - Spinning rod(VSS rubber painting) & Bait rod(ACS rubber painting)
 - Aluminum anodizing technique from Korea

S642UL

- Jighead, Neko, Wacky, Midstrolling
- Minimize blank moving of Butt to provide optimal balance for tip management

S662L

- Fast taper. Soft and strong blank power
- Spinning tackle. outstanding in general.(All fields such as stream, river, reservoir, etc)

S672ML

- For long-cast, and search are mainly possible with one tackle
- Minimize the vibration of the blank, producing accurate casting and high-sensitivity
- The integrated Hard EVA grip improves sensitivity delivery and enables stable lure operation

BF662L | BF662ML

- Strong Butt, which will be the standard for two-piece BaitFinesse fishing
- Long-distance casting, excellent operability and hookset ability. Use small rubber, Jighead, Neko, Kaiser, Wacky Gear

BC672M

- Fast Taper (two-piece, but keep the taper of the one-piece to the fullest)
- Bait tackle. High-pitched, delicate operation
- KIGAN "Z" Guide (strong bait and delicate spinning, the greatest generality)

BC682MH

- Suitable for Bottom fishing (Downshot, Texas, Rubber Jig, etc)
- Walking anglers prefer it the most (Strong and tough blank mechanism)

BC702H

- Have the power, taper, and torque of One-Piece Rod. It can cast and manipulate a swimbait, a big bait, frog, punch rig within 2 oz

BC712XH

- Two-piece model boasts powerful torque for cover fishing enthusiast
- Apply the optimal design system to satisfy both portability and functionality

BC712XH	2,160	2	1,110	3/4~2	14~30	2.2	14.6	159	99%	Fast	180,000

Package: High quality Hardcases | Origin: South Korea

It inherited the reputation of NIXX POP; beyond the entry-level, introductory level, it completed the best rod of its class with high-performance, rational and emotional design design. It is a high-cost product that upgrades blank power further by improving sensitivity, optimal balance design and high-strength compression carbon through new method using high-elastic carbon.

- BLANK Materials :** High Elastic + High Strength Compressive Carbon
BLANK mechanism :
ZCT CONSTRUCTION(Carbon tape winding method)

- The broken situation by the repetitive external stress is minimized (Powerful casting, fierce fighting, etc). Winding carbon tapes on blank surfaces
- SHD (Super micro High Density carbon) Remove unnecessary space between layers from the laminating structure of the composites materials and reduce unnecessary resin to increase lightness and power and enhance line sensitivity

Guide :

- FUJI latest "O" CONCEPT Guide: light weight realization Minimize the deviation and breakage of the guide ring through the DEEP PRESSED method.
- Designs to enhance grip feeling by choosing Portuguese natural cork
- Two-tone aluminum anodizing technique
- Use rubber painting Reel seat (to enhance grip and relieve fatigue)

S662ML

- Use small hardbates and jigs around 1/8-1/4oz. Long-range cast capability and strong Butt make it easy to control the target. The efficient operation in the pinpoint fishing

BC652MR

- A dancey, rhythmic operational ability. All-round model that can cover small and medium-sized Jerk, Crank, Spinner, and lipless crankbait

BC672M

- Using 7 to 10 g jigs including No singker, Light Texas, Free rig, Downshot, etc. Basic Bait rod model

BC692MHF(Full Handle)

- In Korea, where four seasons are clear, the large range of allowed lure is a great advantage. It boasts overwhelming action and sensitivity with strong Butt and flexibility. Target is suppressed with a wide range of response capabilities from jig to buzzing in 8~15g zones

S632UL

- Specialised in jigs from 1/32 to 1/16; with a soft Tip. The Butt part is excellent for casting and operation of midstrolling by minimizing blank moving

S642L

- Spinning Rod Operations-focused model. Tips that react delicately; immediate response to the fine movement of the light Jig series of about 1/16 to 1/4oz

BC712HF(Full Handle)

- Overpower the monster class with a strong Butt in the heavy cover. (the operation of the Rubber, Heavy Texas, Punch, Buzzing, Frog, medium-sized Alabama rig possible)

BC742XHF(Full Handle)

- It boasts a powerful torque for cover fishing enthusiasts. Apply the optimal design to satisfy both portability and functionality at the same time

NIXX BOOSTER2

Based on its dynamic and future-oriented design and long experience in manufacturing Bass rod, we have completed an elegant introductory rod. Blank with good resilience and high sensitivity, a characteristic of pure carbon. The sensation system which beginner can easily cast, and can feel can attract the interest of the lure fishing beginner by enhancing the riverbed sensitivity and Bite sensitivity.

S642L

- It is convenient to use the lure of various uses most widely when using one spinning rod. (Available in a wide range, including Jighead, Downshot, and Plug)

S662ML

- Power Finance; Multipurpose products that can use various lures and rigs beyond the concept of spinning rods
- The high-weight lure's long-distance cast ability is excellent, and it is loved by many walking anglers because it has excellent hookset ability in Bite from afar

BC662M

- Standard model considering both length, power, and action
- One can operate a number of lures. High-performance Rod, which is the most basic and diverse in walking fishing

BC682MH

- Use free rig, rubber jig, Texas rig. It has generality and power to digest and respond to heavy-weight lures

BC702H

- It is essential for enthusiasts who like No sinker buzzing fishing and structure fishing in heavy covers. (The strong, tough muscular tissue overpowers all Big Bass)
- Soft tips help Rubber jig's delicate operation and natural inhalation to ensure successful landing

More dynamic fishing
NIXX BOOSTER 2

SSOCHI M5

"Master's Spirit With SSOGARI(Leopard mandarin fish) ROD" It is an advanced mandarin fish rod that combines the D.N.A of mandarin fish and demonstrates its luxurious and more excellent ability. Future-oriented designs are applied for long use. Starting with the desire to develop the most ideal Rod, there will be no more perfect mandarin fish rods.

BLANK material : HELIX SNM + ultra-high elastic carbon (40+46t)

- Develop and select the most complete materials for light weight, lightness, strength, power, etc., to increase the resilience of the blank and to make a great power with less power

BLANK mechanism :

- HEXA CROSS CONSTRUCTION (6axis) + HELICALCORE CONSTRUCTION+ SHD + X-JOINT
- The ideal carbon fiber arrangement was achieved. Helical core is applied to the inside, and hexacross is applied to the outside to realize power performance. (SHD was applied simultaneously to achieve light weight and high sensitivity)

Guide :

- FUJI Newly Developed Ceramic Titanium Frame TORZITE Guide. High-performance Rod, Reel, Line. The ideal guide that realizes ultra-high strength, ultra-thin, ultra-light, ultra-low friction to the limit
- Butt Guide KR ø25 is employed; long-distance cast capability equal to normal ø30 size
- FUJI's New 3D TANGLE FREE ARONA Top Guide; Perfect line twist prevention
- The ultimate Rod with the most ideal blank + Guide that can maximize it

FUJI's New touch type "TVS" reel seat is mounted. Upgraded the grip that enables accurate casting without loss of sensitivity delivered from blank. The future-oriented titanium mirror painting method was applied for the first time in Korea, making it attached for a long time.

S582L (JERK MASTER) | SSOGARI Minnowing

- It is equipped with an innovative carbon fiber arrangement and structured blank for its lightweight Mandarinfish lure operation ability, casting ability, and strength to overcome strong valley water

S662UL (JIG HEAD GAME)

- The appropriate taper because of its lighter weight and blank ideal power to target Mandarinfish. The most ideal UL Rod
- Ultra-elastic but definite Bite ability

S672L (VERSATILE) | All round general purpose

- Directing the perfect Fast action, it is light and resilient
- The right power setting, and the sensitivity that can feel the weak movement of the Grub worm

S702LF (LONG CAST) | Surfcasting Game Rod (F Action)

- Surfcasting ability is basic, and it has the detail to make Bait dead warm up

S641L (VERSATILE) | All round general purpose (1PC)

- It has all the advantages of a one-piece. The best weapon to cover all the terrain in Korea, such as dams and reservoirs

Ssochi N Classic

BLANK material :
40TON + 46TON High Elastic Carbon + HELIX SNM 1500 + HEXA CROSS Method

- EQUIPMENT :**
- FUJI TITANIUM TORZITE KR. K Guide
 - Natural BLACK Strengthening Wood Reel seat body + Cork + Aluminum Reel seat Hood
 - Portugal's finest "AAAA" Grade Cork Grip
 - JOINT SHD method apply
 - Classic reel seat, the lightest in the class

S632UL | Jig Head (KR Guide)

- JScompany's own model dedicated to worms. Developed to match the weight of the most used jig head. Fast action and high elastic blank close to perfection. Send a fine bite and deliver it quickly

S652L | Universal (KR Guide)

- The most versatile model. It can be used from lightweight jigheads to heavyweight jigheads. Rod, which incorporates JS's technology that has been verified for a long time
- a representative Mandarinfish mainstream rod designed to easily identify and respond to weak bites coming from the deep bottom

S5102UL | Minnow (K Guide)

- Operation of small, medium minnows of all kinds, from tributary Mandarinfish fields to masu salmon, Rainbow Trout Mountain stream fields. A resilient blank design that perfectly harmonizes softness and strength. Flipping, Twiching, Jerking, Shaking, etc. All-weather stream fish minnow game-only Rod that can be used comfortably and can reach easy pinpoint as well as excellent distance

Package: High quality Hardcases | Origin: South Korea

SSOCHI M3

BLANK material :
HELIX SNM + ultra-high elastic carbon (40t)

- We have worked on material research and development over the years, and finally we have completed our own materials and structures
- HELIX SNM: New materials based on silica nanometrics that are resistant to shock, tensile, torsion, and elastic to make light and strong blanks

BLANK mechanism :

- SDS CROSS CONSTRUCTION
The internal helical core structure enhances the restitutive force of blank and makes the long distance Cast possible with the little power. the target is easily suppressed in the deep depth of water and strong Rapids
- The external 3-axis winding structure has excellent ability to cope with external stress. The bending direction remains constant to enable accurate cast and counter torsion external stress

- Super micro High Density carbon (SHD)
Sensitivity is a very important factor in Mandarinfish fishing, which is mainly aimed at the riverbed. Designed close to pure carbon: eliminate unnecessary space between layers from the laminating structure of composite materials, reduce unnecessary resin, increase lightness and SensitivityFuji

Fuji Titanium KR Guide Concept :

- "KR" guide system with titanium frame which improves the PE line twist prevention, accurate casting and long range casting ability
- Equipped with a ø25 butt KR guide; Same surfcasting ability as a normal ø30
- FUJI's new blank touch type "TVS" reel seat is mounted
- Reel seat : Sensitivity is delivered without loss, and accurate casting is possible. An upgraded grip
- CastingRod: FUJI SKTS Reel seat rubber Paint finish

S592L | Jerking action-only Rod

- Maximize Minnow's distance with soft tip action. It is possible to produce a soft retrieve Jerking action rather than a strong jucking action form thought in bass fishing. Soft tips not only facilitate casting, but also help you overcome Short Bite

S622UL

- Birth of a new concept UL Rod: Changed the standard of universal Mandarinfish Rod. Most of the weight of Jighead, which was previously operated between UL and L power, can be used. Minnow fishing is also possible in the licked area. It's perfect for exploration fishing

S662L

- It is not a soft-feeling general-purpose Mandarinfish Rod, but a model suitable for a somewhat heavy jighead or spoon. A model that shows excellent performance in river fishing with high precipitation and fast flow rate. Feeling the flow of water and reacting accurately

BC662L

- The biggest difference between the Spinning 662 and Bait Casting 662 models is in the process of directing the action. The spinning rod of pulling action directing and the bait rod of the form of lifting up are clearly different in delicate action directing. In the case of BC662 model, the mandarin fish's Bite can be obtained through the underwater structure exploration or slow action production process. If you want to seduce Mandarin fish who is not interested in bait, choose

NEW

SSOCHI AIR

Lighter and lighter. SSOCHI N AIR born from the use of new materials HELIX SNM + GRAPHENE. It meets all three factors that determine the completeness of the Rod: weight, strength, and sensitivity. Blank, which blends graphene on Helix SNM, boasts high strength and ultra-light. The light weight leads to lightness and sensitivity improvement, maximizing the fun of fishing with casting and operation. You can enjoy the continuous response of the lure in the water like a rhythm.

BLANK :

40~46TON high-elasticity CARBON + helix graphene + helical core + SHD
 FUJI GUIDE : FUJI titanium "KR" concept SIC GUIDEFUJI
 REEL SEAT : VSS16 + KDPS16GM/ASH
 REEL SEAT BODY SILVER mirror spray
 GRIP : "AAA" Class GRADE (FULL GRIP)
 Combination method : high-elasticity CARBON JOINT (X-JOINT)
 AL BUTT CAP : Application of Air Vibration System for Improving Bite Sensitivity

S632UL | Worm

- With a perfect balance, you can enjoy light fishing even after long use. The water environment can be effectively inferred through the delicate sensitivity and the more Finish Jighead operation is possible

S632L | Universal

- The most standard model, which is not lacking in the use of various techniques as well as the digestion of all lures used in Mandarinfish fishing
- Excellent performance can be expected in river fishing with high precipitation and high flow rate. A model that can feel the flow of water through delicate sensitivity and accurately produce the intention of an angler

S652L | Universal

- Models with the strongest Butt and Power of the Universal Series
- It exhibits true value in fields with high precipitation and strong flow rate, such as deep depth dams and downstream dams
- Lightweight to high-weight luer is available, and it is never pushed back by the fighting of the large-class Mandarinfish met at strong rapids

S602L | Minnow

- We lightened the entire Rod for the Mandarinfish Minnow game in tributary and main stream. powerful rod-work
- It uses 3 to 8 grams of small, medium, and large minnow. Medium Fast / Moderate action to relieve fatigue when used for a long time. Everyone can enjoy the Mandarinfish Minnow game easily and coolly

SSOCHI M2

Under the proposition of inheriting the legitimacy of mandarin fish fishing, we can enjoy stable fishing based on the design of an integrated cork grip. Paradoxically, a new technique was needed to introduce a design to express legitimacy in mandarin fish fishing that exists only in Korea. This allows you to introduce new but traditional rod designs.

Blank material :

30~40TON BASE + helical core method application
 FUJI GUIDE : titanium "KR" concept SIC GUIDE
 FUJI reel seat : FUJI VSS16 REEL SEAT + KDPS 16 IC/ASH HOOD
 Reel seat COLOR : Mirror SILVER + DARK RED spray
 REEL SEAT SILVER : mirror spray application
 #1번대와 #2번대 결합방식 : CARBON JOINT combination method
 Two-tone Aluminum Anodizing
 Grip : "AAA" Class CORK GRIP Application (FULL GRIP)

S652UL | Jig head

- Rod optimized for jighead fishing. 1/8-1/16oz Jighead is used and the underwater topography can be effectively inferred. Rod optimized for UL specs in m2 series. You can feel small changes such as the texture of the riverbed and the change of the water speed. Fast overcoming difficulties in any field

S662L | VERSATILE

- Designed to become the basis of the Mandarinfish fishing rod in Korea after inheriting the reputation of SSOCHI. Various lures can be used effectively and there is no shortage of Mandarin fish lure fishing based on classical design. It has excellent casting distance in operating about 7g of lure and is easy to fish in strong rapids or deep dams. The standard Rod of Korea is L

S662L | SOLID TIP

- The specification differentiated from the L rod by taking advantage of the solid. Designs are made by utilizing the unique curve of the spinning rod compared to the basic L-rod. Light and sleek tip effectively operate lighter lure than conventional L-Rod
- If you have suffered a lot of trouble in a short Bite time, you can easily meet the target by using solid tips

S562L | MINOW (Butt separable)

- Rods with short lengths for fishermen who prefer fishing in the water wearing Wader. While directing the action that blows life into Minnow all day long, it does not feel fatigue. Design that minimizes interference with vests
- It is easy to increase the distance with one hand casting. By using the soft tip, the flying distance is secured. Optimized form for Hardbait between 5~9g. If use a 12g's Spoon Lure, get explosive distance
- Designed to have technical operationality

Package: High quality Hardcases | Origin: South Korea

We released a series of mandarin fish exclusive rod rods with various specifications to match the mountain stream with different characteristics in each region. The various fish species can be attacked and the various lure can be selected. The momentary power and repulsive force have long been verified by the engineers of JScompany. Designed with low-resin, pure carbon close to 100%, and multi-structure layer.

BLANK Materials:

High-elastic pure carbon (30 ton low resin composites)

- the finest blanks using the best material
- Blank mechanism: ZCT CONSTRUCTION (carbon tape winding method)
- The toughness of Mandarin fish sometimes causes the break of the fishing rod. The SSOCHI M1 series is designed to minimize this situation. Maximize blank power : wind carbon tapes around the surface to strengthen external stress, and increase torque.
- SHD (Super micro High Density carbon) Eliminate unnecessary space between layers from the laminating structure of composite materials, reduce unnecessary resin, increase lightness, power and line sensitivity

EQUIPMENT :

- KIGAN 3D ZERO TANGLE GUIDE mount : Improve sensitivity and casting ability, overcome line troubles, and improve fishing rod balance
- Portuguese Natural CORK Grip • Aluminum anodizing technique from Korea
- Increase grip and line sensitivity using rubber painted SKSS reel seat

S642UL

- It is suitable for most river terrain in Korea, where the depth is less than 2M and the rapids are not strong. It targets various fish such as mandarin fish, Trout, perch, redbin, etc. Optimal for using Jighead of about 3g.
- The unique short breaking Bite during the test process is impressive. an innovative weight of mid-80g.

S662L

- Designed by ZCT method, it has excellent overpowering and operating ability and long casting ability in strong rapids. Hardbait(Minnow, Spoon, etc) and Jighead (Worm gear, etc) are available.
- Do not feel tired even during the long test process.

BC632L

- It has a guide arrangement and a taper suitable for Mandarin fish fishing using the lightest Gear. Products that can produce dynamic fishing techniques with fast search and superior distance.
- The line anti-twist guide is equipped and the danger of the backlash is minimized.

SC522SUL | Aucha perch

- Considering the characteristics of perch fishing, where Casting and Retrieve are quickly repeated. Maximize operational efficiency with short and concise blank length and grip design
- Strong Butt and soft Taper secure enough distance to cast light Gear

SM602L | Minnow

- Korea's first Jerk bait Mandarin fish rod
- Spec for the Mandarin fish Minnow game. Soft, resilient tips to increase Bite probability. Strong torque Butt. Resisting strong currents and free to operate Lure
- Short, light, soft, and powerful. Products suitable for long-term Jerking

INFORMATION

SC522SUL(Aucha perch)	1,580	2	820	1~7	1~4	1.1	7.1	75	99%	Fast	145,000

Package: High quality Hardcases | Origin: Chinese local factories

A rod that understands the stream topography of Korea well. It is the strongest model in its class that has excellent situation coping ability and does not inconvenience selecting various fish species(Leopard mandarin fish, Trout, Skygager, Korean aucha perch) and lures of the river. It has a momentary force and a repulsive force that seems to bounce. It's designed with a low resin, 100% pure carbon multi-structured layer, long verified by JScompany engineers. We adopted the Korea 3D SIC guide to reduce slip and fatigue by using high-density cork grip and rubber-painted reel seat with good grip and durability

S632ULL

- Designed to make it easy for anyone to enjoy stream lure fishing. Considering the hands and body shape of Koreans. Easy to operate and carry
- It can target various targets(Leopard mandarin fish, Trout, Korean aucha perch, Big-scaled redbin, etc). High-intensity blanks and innovative balances make it easier to operate fishing rods
- Enjoy both the momentary power and the thrill at hand

S662L

- The ability to cast long distances, and the excellent Hookset ability by soft and strong Butt
- Excellent suppression ability in the wading or the rapids
- Rods that can digest a variety of lures, including Hardbait in Spoon and Minnow and Worm gear operation in Jighead

S702L

- A product with excellent power and movement so that there are no points that can not reach and no fish species that can not be overpowered.
- Specification for anglers who want light power for long casting

BLANK material :

High elastic pure carbon (30+40t)

- Highest-end blanks with the best materials
- Blank mechanism : multilayer method
- One-way fibers have the advantage of increasing vertical strength, but they have weaknesses in bending blanks due to weak horizontal strength. The weak point is supplemented to the multi layer structure of laminating the carbon sheet thin with high density

EQUIPMENT :

- Apply the best "Z" guide system in existence to maximize sensitivity, casting ability, line trouble overcoming, balance improvement, blank movement
- High-end Portuguese Natural Cork Grip
- Aluminum anodizing technique from Korea
- Reel seat : Shimmery painting to make the grip feel better

SSOCHI BOOSTER 2

JCompany has been leading the expansion and popularization of Korean Mandarinfish fishing. We are launching the highest specifications of low-end rods so that anyone can easily access and enjoy mooring lure fishing by inheriting high-end products.

Specification :

Realizing high elasticity and light weight of blank using heavy elastic carbon with increased density of carbon fiber

EQUIPMENT :

- The SSOCHI BOOSTER series is equipped with the latest guide system that minimizes string twists to increase distance and improve sensitivity
- Hard E.V.A Grip
- Rising gripping sensation using rubber painting Reel seat

S642UL

- Focus on lighter weight, throw light lure away
- High-intensity blanks to target various fish species along the river.
- The most suitable specification for 4lb line and 4g of jighead gear
- BUTT GUIDE 25 f

S662L

- It is suitable for longcasting in tough fields with wide widths and fast flow
- Highest universality: Hardbait (Metal spoon, minnow, etc), Jighead (worm, etc)
- Lightweight that reduce fatigue in fishing for a long time
- BUTT GUIDE 25 f

Asense Tournament Special

high grade performance rods for TROUT

By professional tournament.
For the professional tournament,
Aerial Trout Fishing Rod.

"Make sure take the bait" "We must catch". Ariel Trout Fishing rod born as a wish of professional anglers. The Ariel tournament, as tournament pro anglers say: "First, we have to overcome the short Bite caused by the high stress of the fish. Also, a rod is needed to be able to land quickly and stably while the control is simple" So we introduce the first trout area-only rod with solid tips to meet the needs of professionals through the new Asense Tournament Special Series. The Asense Tournament Special was made with 30-ton carbon solid tips and a 40-ton high elastic power carbon of HELIX graphene to implement fast tapered power.

BLANK : Application of 40TON High Elastic + HELIX Graphene
FUJI GUIDE : FUJI titanium "SIC" KR concept guide
REEL SEAT : Aluminum HOOD + WOOD BODY (glaze MAPLE BURL immersion)
GRIP : Applying the best "AAAA"-class CORK

SS602UL-F

- 6' long, most preferred by the tournament anglers. Delicacy, compactness and agility that can not be compared to any rod
- Improve the ease of operation of ultra-light spoons given in a typical UL action by using solid tips. Optimal for Finesse Spooning (Standard, Slow, Dead slow Retrieve)

SS622ML-F

- Plan to enable all hardbait lures
- Fits a situation where you use Hardbait to navigate a widerange (Minnow, Crankbait, lipless crankbait)
- Different Tip-Valley sections accurately detect Wobbling and Wiggling of Lure (Standard, Slow, Digital Retrieve / Jerking, Twitching)

SS622L-F

- From various weight spoons to minnow crankbait, softbaitseries, wide range of lure use (digital, Standard, Slow, Deadslow Retrieve / midstroling, shaking)

SS622M-F

- It is suitable for use in situations where bottom hopping and speedy fishing are required. It has the shortest solid tip and has fast and accurate hook set ability.
- It is a powerful Rod with Fast Tip, but it is effective and fastlanding with regular taper of Valley ~ Butt section (bottom hopping, Digital Standard Slow Retrieve, shaking)

The advantage of solid tip.

The longer the tip bending, the softer and less foreign body feel, but the more often the hookset fails. (On the contrary, the shorter the tip, the better the hooksets are for faster hooksets and hard areas.) We can increase the length of the tip to make it smooth, but we focused on the short and soft bending of the tip to suit the aggressive tournament situation. As a result, the automatic hookset was possible with the elasticity of gently bending and returning from the short tip.

From tip to Valley, it leads to Fast Taper, but lowers power to realize soft Taper. Even when landing many fishes, fatigue is minimized and convenience is improved. To broaden the spectrum of lure to tournament-loving anglers, apply the FUJI SIC KR titanium concept guide. It is usable from the monoline to the carbon, PE, ester line. It was manufactured after about a year of testing to have elements optimized for Korean area Fishing.

Spectacle Tournament,
Overwhelming Sensitivity

NEW

Asense T2 TROUT

BLANK : 30~40TON High Elastic CARBON + Helical Core
 S622ML-F BLANK : 30~40T High Elastic CARBON + S2-GLASS + Helical Core
 FUJI GUIDE : FUJI "SIC" KR concept guide
 REEL SEAT : aluminum HOOD + WOOD BODY
 GRIP : "AAA" class CORK GRIP + BLACK EVA
 Combination Method : High Elastic CARBON JOINT (X-JOINT)

S602UL

- It has the most standard action of the Ultra Light series, making it suitable for use of various weight spoons and small crankbait (SR, surface crankbait)
- The soft taper to Butt-Valley, the delicate taper of Valley-Tip, is very effective in responding to short Bite.

S612UL-E

- Optimize guide caliber and setting to ester lines.
- When using the ester line, it shows the best performance according to the planning intention
- Strong, resilient Butt and relatively soft and delicate Valley-Tip make it the furthest, most accurate casting possible
- Carbon, monofilament, and PE line use are also irrelevant and models with the most overwhelming sensitivity of the Asense T2 series.

S612L

- The model best suited for softbait (midstrolling, rubber jigs, etc). Delivering light, delicate action to Lure is the most important, so use strong butt-valley and soft tips
- Shaking, midstrolling, etc, available regardless of the weight of the lure. Even in tough situations, the sensitive Bite of trout is grasped and it is very effective for hookset, landing

S622ML

- Best for MR~DR crankbait. You can also feel the sensitive vibrations of Wobbling, wiggling and Rolling action.
- The resistance of the deep dive Crankbait is minimized with the strong and soft taper and the fatigue is effectively reduced
- It makes long-distance casting and strike range as much as possible, and hook set-landing connection is possible for Bite from a long distance.

S622M

- It is the strongest power rod in the series, but you can feel the movement of the lure even when using the small lipless crankbait.
- Light ~ high weight lipless crankbait can be used and designed to clearly feel the movement of lure. When manipulating short, minute lures, they show true value (bottom hopping, digital retrieve, etc.)

Asense T1

Specification :
 30TON CARBON BASE + HELICAL CORE CONSTRUCTION
 GUIDE : KIGAN'S SIC Anti-twist guide
 EQUIPMENT :
 • China DPS16 Style REEL SEAT HOOD + WOOD BODY
 • "AA" Class CORK GRIP
 • Fluorescent Fishing Line for Visualization

S572XUL

- Optimized for micro spoon Shorter than the ex-model and is superior in operability
- Easy to operate a spoon of less than 1g. Respond quickly and strongly to frequent short Bite of trout. Shorts, but has the powerful Butt : excellents overpressure

S622SUL

- Operate Hardbait and various sizes of Crankbait: Spoon. The most outstanding distance in the series Induction of Bite against Weak Wobbling

S632UL | 범용

- Universal model : From Hardbait, Down shot, Split shot Rig, which is somewhat heavy in trout fishing, to Rubber Jig, which is small size. Recommended to initiators of midstrolling. Easy to produce the shaking and rolling action of the jig and rubber jig, and it is a grip type that is not tired in long use

BC622UL

- The longest time tested model. Universal Rod to operate various Gears. When using a dedicated Reel : From hard bates in the early and mid-1g range to Jig and Rubber Jig in the range of 2~4g range
- Easy to control trout quickly between obstacles along the waterside of the fishing spot
- Recommended to users who want to increase Finesse fishing skills

Exciting fun!

Asense POP 2

high grade performance rods for TROU

JScompany has been leading the expansion and popularization of Korean trout fishing. We are launching the highest specifications of low-end rods so that anyone can easily access and enjoy mooring lure fishing by inheriting high-end products

S632SUL

- Operate Micro Spoon, Plug, etc
- Throw a light luer far away easily. Models focused on casting ability and lure operations. Most suitable for line of 3lb or so, and lure operation of about 3g

S662JUL

- Delicate operation of micro rubber jig and small soft, plastic bait. It has a soft tip and a Butt power that minimizes moving for accurate casting, so it has excellent ability to grasp riverbed terrain and Bite
- The Line of 4lb and Lure of 4g are operated

Product specification :

Realizing Resistance and Lightweight of Blank Using Mid-elastic Carbon

EQUIPMENT :

- Line twisting in trout fishing greatly reduces pleasure. The Asense POP Trout series uses the latest guide system that minimizes string twists to increase distance and improve sensitivity
- Harmoniously employing CORK and E.V.A on the grip

From exciting to fun

D'LOOP 2 Switch

The DLoop Switch rod is a high-end rod designed to suit the body shape of Korean field and Koreans based on the technology and accumulated know-how that developed and produced more than 100 switch rods of leading overseas brands from the moment it was first introduced to the world market over 6 years ago

- Simple operability**

It's an 11ft Rod but it has a 9ft's weight
Handle position and size design considering Korean body shape
Easy to use as a single hand as well as a double hand
- Understands the fly line**

Hardchromium Snake Guide is more durable than Single-foot Guide
Large caliber and wide distance from blanks to minimize line troubles
Advantageous for long-distance and accurate casting
- Blank excellence**

Blank action, which combines the repulsive power of ultra-high elastic fabric and helical core method, has less moving, increasing accuracy and power to enable long-range casting
- long-standing know-how**

Apply a joint locking system to prevent the separation of the rod during two-hand casting
The locking system is applied to the extension handle to ensure complete fixation of the BUTT GRIP
In addition, high quality Portuguese natural corks grip is used to have a good grip and less deformation for long fishing

DLOOP POP 2

Fly fishing is not difficult, and it is a popular fishing genre that anyone can easily learn and enjoy. JSCOMPANY releases a reasonable priced DLoop Pop series for the popularization of fly fishing.

- Stable guide** Employ a hard chrome snake guide and a SIC stripping guide. Line does not wear out well, and it improves the distance by reducing the friction during casting.
- Enhanced blank** Blank with strong impact and compressive strength. It doesn't break when you catch external shocks and big fish.
- High-end Reel seat** High-quality Portuguese cork grips are employed. Titanium anodizing reel sheets: combine with luxurious black reinforced wood.
- Accumulated know-how** We compared the soft and beautiful melody to fly fishing, and marked blank taper as Tempo signature.

3480 - 4 | 8'0" #3/4 4

- Andantino(a little slow)-Taper: Casts easily, gently settling the Fly and forming a soft loop.
- Among the fish of low mountain streams, mainly Sharp-snouted lenok, masu salmon, etc. are targeted. Stream Fly rod that can digest various patterns such as dry fly fishing, Nymphing, and Wet Fly fishing.

5690 - 4 | 9'0" #5/6 4

- Allegretto(a little fast)-Taper: It has a taper that novice can easily cast, so it has good long-distance casting ability and excellent line control such as underhand casting and roll casting. Mainly targeted at Squaliobarbus curriculus, Skygager, and Trout, and sometimes covers Bass.
- Fly fishing introductory, Multipurpose model.

NEW

airflo 鯛

Surfcasting Rod, which has undergone long-term harsh tests in various fields and rough environments in the West, East and South Sea. AIRFLO has allowed it to respond to coastal fishing species such as Righteye flounder, hexagrammidae, and Korean Rockfish as well as Japanese black pork and Japanese seabream. Minimize the symptoms of distortion during casting and focus on balance; focus on precise aiming ability, and feel light with high repulsiveness of high elastic carbon

Blank material : high elastic CARBON helical core
 FUJI GUIDE : KM + KWM SIC Guide
 REEL SEAT : China KPS 22
 Rear GRIP : RUBBER GRIP apply

5-500H

- Specializing in those who enjoy a simple and sharp Surfcasting
- The simple and clean casting is made possible in the breakwater Surfcasting. And the inconvenience due to the fishing rod length is minimized.

5-530

- 'Standard' Model of Japanese black porgy Surfcasting
- Suitable for use in flat fields such as the East Sea white sand beach, the West Sea, and the South Sea
- Responding to sensitive bites, focusing on delicate tips and balances to minimize foreign body sensations

6-530

- 'All-round' model with the widest generality
- Used for Japanese black porgy Surfcasting in situations where waves are strong. It can also be used in reefs and strong currents in the West Sea and South Sea

7-530

- Designed to respond to large Japanese black pigments as well as large Japanese seabreams
- Strong butts can also overpower large fish, and heavy sinkers to cope with strong tide can be cast stably and accurately

CHARM LIVE RXB

A suitable entry-level model for the West Coast Korean Rockfish attack. We have adopted a 200~210 mm length suitable for beginners. It has a strong Butt that can cope with fishing rope floor jamming. The sensitivity and intensity are excellent enough to be used for fishing in the offshore area

- blank material :
CARBON + GLASS BASE BLANK
- Guide : Line anti-twist SIC Guide (China)
- Reel Seat : TCS17 REEL SEAT (China)
- Anti-skid reel seat black rubber spray
- GRIP : Hard EVA GRIP

CHARM LIVE H5

Rod for beginners and intermediates who prefer the 7:3 Action Taper. It has excellent anti-twist capabilities to adopt Spiral Wrap and provides user-friendly Reel seats and grips

- Blank material:
Carbon + Helical core
- GUIDE : FUJI "KR" ALCONITE GUIDE

- Reel Seat : HOOD : FUJI DPSM 24P/AB / DPSLD 24P/ASH
- GRIP : Used a stainless steel grip with strong durability

NEW

CHARM LIVE H2 갈치

The advantage is the strong Butt power with 6:4 Taper, which can be used from 7~800g(Yeosu, Tongyoung) to 1k(Jeju) or more sinkers. Using high-elastic carbon, you don't miss the bite of baby hairtails as well as large hairtails. New guides are employed to solve the problem of string twists during fishing. You can solve the string twist without lifting the fishing rod

Blank material : Carbon + Helical core
GUIDE : China GUIDE Application
REEL SEAT : FUJI DPSM P/AB24
REEL SEAT HOOD : FUJI DPSLD24P/ASH
GRIP : Use a durable stainless grip

KOREAN ROCKFISH | OLIVE FLOUNDER | HEXAGRAMMIDAE | SPANISH MACKEREL | JAPANESE SEA BASS

BIXOD A4

High-end general fishing rod where anyone who enjoys sea lure fishing can enjoy the thrilling taste

Blank material : Ultra-high elastic carbon (46t)

The ultra-high elastic 46-ton material, which was not used in the Sea Lure Blank, was combined with

Blank mechanism :

HEXA CROSS CONSTRUCTION

A structure made by combining an ultra-high elastic 4-axis CLOTH with a helical core structure (2-axis bias). The loss of power generated during fishing rod operation was minimized to increase instantaneous power and realize the distribution of even power in four directions. The casting power is accurate, the torque is increased in the Hook set and fighting, and the operation is free

Super Micro High Density Carbon (SHD)

Designed close to pure carbon: eliminate unnecessary space between layers from the laminating structure of composite materials, reduce unnecessary resin, increase lightness and power

EQUIPMENT

fuji titanium KR Guide concept
fuji titanium KR Guide concept : "KR" guide system with light and unchanged titanium frame. Maximize power, sensitivity, accuracy, and Surfcast capabilities

Korea's first rubber material E.V.A grip is adopted to prevent slipping and increase gripping

Two-tone aluminum anodizing techniques apply

Reel seat : FUJI VSS shimmy finish Reel seat

the high-quality hard case package which is best for carrying and keeping, waterproofing, and the moisture-proof

BIXOD A3 LUMA

Multipurpose Sea Lure Rod "LUMA" has been consistently loved in inshore casting games such as Rock fishing and breakwater fishing since its launch in 2010. It has been upgraded with the Helix SNM of Super Nano Matrix technology and returned to the name of BIXOD N A3. In the existing "LUMA", which was sufficiently complete, it changed to minimal design change, lightweight, and segmented specifications that lead the trend.

Blank material : Ultra-high elastic carbon (40t)

Ultra-high elastic 40t materials not used in sea fishing lure blanks are combined with helix SNM to upgrade sensitivity, elasticity and strength

Blank mechanism : HELICALCORE

Minimize twisting, which is a disadvantage of laminating composites by winding CARBON THREAD in a spiral direction. Uniform stress acts on all points of Blank, increasing instantaneous power, and enabling precisecasting and operation

EQUIPMENT

fuji Titanium "KR" Guide concept apply, Light and unchanged titanium frame mount. Maximize power, sensitivity, accuracy, and Surfcast capabilities

Rubber E.V.A Grip : Prevent slipping, increase grip, and lower fatigue

Reel seat : FUJI TOUCH TYPE TVS SIVER MIRROR

S762L-ML

- Products for sea lure fishing anglers
- It targets various fish species of basin sea area(Olive flounder, Korean Rockfish, Jack mackerel, Chub mackerel, etc)
- Best for kayak and Recreational boat fishing

802L-ML

- All-round models that do not cover places and fish species
- Attack moving fish(migration) and Rockfish species with lightweight metal jigs

S862ML

- Rock fishing, breakwater Flat fishing, Boat casting game: Use a high weight Lips Sprint or Minnow

BIXOD A2 -VER.2-

FEATHERLIGHT & SENSITIVE BLANK

- Optimal weight balance** A comfortable fishing for long-term casting and action
- Excellent sensitivity** Flexible and soft tips can also use very light Lure and a thin PE line of 16 to 30 lbs. Boasts excellent Bite and floor sensitivity, which will show excellent results in rockfish and sea bass games
- Casting and operability convenience** The helical core method that maximizes the torque of the blank increases the repulsion momentarily. A soft tip prevents the bass from pulling out the needle

S762L-ML | Jighead, Hardbait

- All-weather Rod operating Jig head, Hard bait, etc. at Shore. A light weight of 7 feet 6 inches makes it easier to navigate points
- Blank Grip's ML-class power setting. You can cast 1/4oz lightweight Gear to the correct location with elasticity
- Tip's L power/Fast action setting flexibly responds to the struggle to remove irregular needles with sensitive sensitivity

S862ML | 13~35g Jighead

- A model to increase the convenience of complex Gear operations in various terrains as well as wide open water. Light model in the A2 lineup. It is designed to promote the convenience of anglers who try various Gear changes
- Repeated long-casting is not burdensome with flexible setting and grip-oriented balance design for Jig head less than 1/2oz
- The main target is based on rockfish, but it has the power not to lose the lead even to large sea bass and macroel

S7112ML-M | Jighead, Metal, Downshot

- Sea bass long-casting Jig head, metal, down shot exclusive Rod. It was born at the request of Angler to increase the casting distance while pursuing the convenience of the short rod
- Helical Core M Power Blank has the repulsive power which is relaxed in the high weight Jig casting

S902M | Long cast Down shot, 1oz Jig

- A good model to hit a high-weight Gear for long-casting on pinpoints. The helical core method was applied to the 40T high elastic carbon to increase the elasticity and strength to the upper model level
- Sensitivity to feel excellent Bite and current flow even after long casting
- Universal rod characteristics from 9ft length can also be used to respond to sea bass games that focus on Lipless spintail and Minnow
- A model that demonstrates outstanding casting torque during casting of 18 ~ 25g minnow

S972MH-H | East sea Metal, Mackerel, Amberjack

- A model to target migration fish from deep breakwater and Shore
- Fits the field condition requiring rapid suppression after bite
- Powerful, high elastic blank. Progressive performance with weighty Slow jig, Metal, and Minnow's long casting
- A quick response from a length of 9 feet 7 inches Blank repulsion effectively overpowers the strong resistance target

NIXX INSHORE

PERSONALITY IN THE SALTWATER IN-SHORE GAME ROD

Korea, which has three sides of the sea, has excellent accessibility and can enjoy sea fishing comfortably in breakwater, Shore, and basin sea area. The NIXX INSHORE series is the best choice for all anglers who enjoy sea fishing because they are not well broken and have excellent sensitivity and light weight

- Blank material : ultra-high elastic carbon(40t) + high-strength carbon(30t)**
- Optimal fusion and design of composite materials. Higher Bite and sensitivity and lighter weight and higher strength Blank mechanism :
 - Z-CT CONSTRUCTION (Carbon tape winding) Sometimes fishing in the sea breaks the fishing rod unthinkable. The NIXX INSHORE series is designed to minimize this situation by winding carbon tape on the blank surface and strongly designing it for external stress
 - SHD (Super micro High Density carbon) eliminate unnecessary space between layers from the laminating structure of composite materials, reduce unnecessary resin, increase lightness and power
- EQUIPMENT :**
- Application of 3D "Z" GUIDE System of KIGANISM. "Z"s guide system improves sensitivity and casting ability, prevents string-twisting troubles, and improves fishing rod balance.
 - S1102M Model : FUJI "ALCONITE" K Guide (30mm Double foot Tip Top Guide)
 - Higher durability and gripping sensation by adopting Korean light E.V.A grip
 - Coating Technology for Responding to Salt Water using Korean Aluminum Anodizing Technique Reel seat : The VSS rubber painting reel seat is equipped with a comfortable grip feeling for repetitive casting

S782L

- The light weight blank capable of the minute Bite sensing and the exact floor topography detection
- Light weight lure can be easily cast at a distance, excellent resistance and resilience.
- Jighead and Downshot are available, making it the most universal specification to target various sea fish species. (Korean Rockfish, Olive flounder, mackerel, dark-banded rockfish, etc)

S972ML

- Models Born for Dynamic Ship Fishing. Migration fish like sea bass, amberjack, mackerel, etc
- Torque, which can easily cast lures around 30g. The best pressure and casting distance.

S862ML

- All-round Model for Boat and Rock Fishing
- In Boat casting games, Minnow and Lipless spintail are operated.
- Designs to make Shore Flat Fishing more efficient
- The most recommended model if you buy only one from Sea Lure Fishing

S802H

- Model for boat mackerel game. Short length makes it free to operate
- It boasts a torque that can easily cast lures such as Metal Jig and Lipless Spintail of less than 60g

S902ML

- Models Appropriate for Boat and Rock Fishing (sea bass and rockfish, etc)
- Soft Tip, Powerful Butt, Perfect Taper Balance increases the Hook Set probability and increases the casting distance

S1102M

- It is a rod designed for rock Shore longcast fishing. It has the advantage of torque that can cast lure such as metal jig and jig head of less than 40g. For mackerel, sea bass, rockfish, olive flounder Fishing

NEW

NIXX POP INSHORE -VER.2-

Introductory products that are essential for walking-fishing on the sea. Increased the diversity of target fish species than before

BLANK : 30~40TON high-elasticity CARBON BASE + Helical core + Z-CT
 KOREA Samyang GUIDE : "Zirconia" KTSIG + KWSIG Guide
 FUJI REEL SEAT : VSS16 + KDPS 16P/ASH HOOD
 REEL SEAT BODY : BLUE COLOR Spray
 GRIP : BLACK Hard EVA GRIP

S762L

- Products needed for the baby hairtail fishing season in the South and West Sea. Specialized in rock fish jig head games on the coast and jig head action in the baby hairtail season

S862ML

- The basics of walking fishing rods: one cover a variety of Gears
- There is no fatigue even in fishing for a long time.(Use Jig head, Lipless spintail, Downshot, etc)

S932M

- The use of heavy Jig head and Lipless spintail over 1oz. It is good to target the coastal Japan sea bass and Olive flanker, and the distance is good at the right length

S832H

- A model that can throw 80g of metal without any problems: a model with strong butt and flexible Tip, which focuses on distance and pressure; heavy metal and coastal octopus can easily be landed

S842XH

- A dedicated product made to catch octopus in the South Sea that is trying to stick to the floor

Beginner's taste

Package : CLOTH BAG + PET CASE | Origin: Chinese local factories

can30 INSHORE

We lowered the wall at the entrance to Lure.

It is a Rod designed for sea lure fishing beginners and consumers who want sub-Rods. It has a marketability that is not lacking in operability, elasticity, balance, etc. at a reasonable price, so anyone can easily enjoy it

24TON CARBON BASE
 GUIDE : FUJI CONCEPT "O" GUIDE
 • China vss16 REEL SEAT
 Reel Seat : anti-skid black rubber spray
 GRIP : Black strong eva GRIP

S802L

- Focus on delicately operating a relatively lightweight lure of 8~25g. The soft tips make it easier to receive floor terrain or sensitive bite, and the resilience of tough, flexible butts makes it easier to overpress the target

S862ML

- The most standard model for casting and manipulateness of Boat and Shore games
- Flexible tips and strong butts respond satisfactorily to any technique

S902M

- Strongest torque model, heavy lure can be cast further than
- Respond to large migration fish with strong pressure. (Japanese sea bass, Spanish mackerel, etc)

We lowered the entry
 barrier!
CAN 30 INSHORE

BIXOD S4

A model that focuses on balance rather than sensitivity as a Sea bass rod for boat and rock fishing. The slim but tough blank flies Lure farther away and prevents fish from pulling out the needle

Blank material : Helix SNM + ultra-high elastic carbon (46t)

- Upgrade sensitivity, elasticity, and strength by combining ultra-elastic 46t materials that were not used in the sea luer blank with Helix SNM

Blank mechanism :

HEXA CROSS CONSTRUCTION

- A structure made by combining an ultra-high elastic 4-axis CLOTH with a helical core structure (2-axis bias). The loss of power generated during fishing rod operation was minimized to increase instantaneous power and realize the distribution of even power in four directions. As a result, casting is accurate and needle loss is minimized to increase landing probability. The torque is enlarged in the Hook set and fighting and the manipulation of lure is free.
- Super Micro High Density Carbon(SHD) : Designed close to pure carbon: eliminate unnecessary space between layers from the laminating structure of composite materials, reduce unnecessary resin, increase lightness and power

EQUIPMENT :

- fuji titanium KR Guide concept : "KR" guide system with light and unchanged titanium frame. Maximize power, sensitivity, accuracy, and Surfcast capabilities
- Korea's first rubber material E.V.A grip is adopted to prevent slipping and increase gripping to lower fatigue
- Two-tone aluminum anodizing techniques apply
- Reel seat : FUJI VSS shimmy finish reel seat
- Using a rubber painting VSS reel seat, it is possible to increase gripping sensation and relieve wrist fatigue

S972ML

- The model that made S4 known the most. An excellent distance. Unlike conventional rods, the overall curved taper exerts Surfcast ability when throwing 18~26g of Minnow
- You can cast lures heavier than specs easily and far away. Soft Butt helps stable landing, and it is the most selected item regardless of Boat or Rock fishing

S1002MH | 넙치, 농어

- Olive flounder and Japanese sea bass fishing products that can be found in Jeju Island
- Fits for Minnow casting of various weights of 18~40g

S872L

- It can control from small Jig Head chatterbait to Minnow. It is not tired in the fishing of the long time
- Rock, Boat Fishing are all available and have excellent balance

S902L-ML

- A model that uses light minnow. Butt throws the bait well and holds on to the weight well. Casting Small Minnow and Jig Head without difficulty

Package: High quality Hardcases | Origin: South Korea

BIXOD S3

It is a fishing rod exclusively for dynamic and tough Japanese sea bass fishing. Slimmer, lighter weight, higher elasticity. It's a masterpiece that took Blank's mechanism to the next level.

Blank material : HELIX SNM + ultra-high elastic carbon (40t)

- Over the past few years, we have spent our time researching and developing new materials to be applied to fishing rods, finally completing our own materials and structures
- Based on Super Nanometric, HELIX SNM is a new material that is resistant to impact, tension, twist, and elasticity to create a light and strong blank

Blank mechanism :

HEXA CROSS CONSTRUCTION

- 5DS CROSS CONSTRUCTION, POWER X-WRAP :
- The internal helical core structure increases the resilience of the blank, allowing long-distance throwing with little force, and easily overpowering fish in deep water and strong rapids
- The outer three-axis winding structure has excellent ability to cope with external stress

- The bending direction remains constant to counter the static and external stresses
- POWER X-WRAP : In tough and sensitive sea bass fishing, the performance of tips is very important. The POWER X-WRAP winding method was applied to create powerful casting and increase overpowerFUJI TITANIUM Guide :
- FUJI's New 3D TANGLE FREE Aroana Top Guide adopted. The PE line is no longer twisted
- 3D REVERSE CHOKING Guide system adopted. Complete the optimal sea bass rod to facilitate automatic line twist prevention and line releaseFUJI "VSS" Reel seat + RUBBER E.V.A :
- Using rubber painting VSS reel seat to increase gripping and relieve wrist fatigue

S882L-ML | MINNOW GAME

- 15~24g of minnow available
- A slim and powerful blank that can penetrate the wind by securing a distance even with a simple stroke
- The tip has the flexibility optimized to prevent the needle from falling out, and Butt has an excellent 5DS structure with excellent shape restoration, so it has excellent landing ability

S922ML | ALROUND GAME

- It is used for general purposes such as Boat and Rockfishing: Minnow, Illipless crankbait, and soft bait are all available
- 5DS structure capable of the long-casting in the simple stroke. Good for boats or narrow seashore that don't have enough casting space
- Excellent skills in sea bass fishing and flat fishing

S972ML-M | LONG CASTING GAME

- Specs for rock surf fishing enthusiasts, a lure of about 30gweight can be reached to the desired point
- The momentary torque overpowers the fish and lands
- The coastal Japanese sea bass, Spanish mackerel, and small Yellowtail amberjack are attacked with various lures

S1102M-MH | SHORE CASTING GAME

- Excellent ability to target large species and settle lure at the point you want in Rock Surfcast fishing
- The 5DS structure has excellent repulsive power, enabling smooth long-distance throwing of high-weight metal jigs or poppers
- Responding to Shore Jigging and Popping Fishing(Large sea bass, mackerel, amberjack, etc)

BC862ML | BAIT CASTING GAME

- Bait model which is getting attention in recent sea fishing
- Bait casting has a wide range of applications, targeting various fish with various Lure
- With the appropriate guide arrangement, the movement of blank force is naturally made when casting, eliminating backlash and smoothly throwing at a long distance
- It is recommended to baitcasting fans because it can operate hard bait, metal jig, soft bait, etc

Package: High quality Hardcases | Origin: South Korea

BIXOD S2

The Sea Bassrod series, which accepts the requests of the field and continues to evolve.
We aimed to develop a Rod with more performance and power than expert-users's demand.

Blank material : 40TON high elastic carbon + helical core
EQUIPMENT : FUJI SIC "KR" + "K" Guide
Spinning Reel Seat : FUJI VSS16
Baitcasting reel Seat : FUJI PTSMPK17
Black superstrong EVA Grip

S862ML-M | Bolt

- Development focus was on maximizing ease of handling such as Minow, lipless crankbait, Jighead, and Metal Jig
- With a simple stroke, accurate targeting, long-distance casting are possible
- Butt Power has also been upgraded to prepare for unexpected fighting with large fish

S912L-ML | Sprinter

- Development of detailed actions such as small Minow, lipless crankbait, lightweight Jighead, Metal jig, etc
- Depending on the situation, you can get a lot of Biteopportunities by using Finesse actions
- It has slim but powerful torque. Delicate and flexible to respond to any situation

S882M | Vulcan

- The development focus was on casting and settling all the lures of the heavy-weight class quickly at the desired point
- Fighting with the ranker class (7Kg) or higher is also leisurely controlled by raising the persistence of the Butt for quick casting
- It can respond delicately to any movement and attack points at a distance for a long time without rest

S972M-MH | Cannon

- Developing a focus on delicateness and high sensitivity in the operation of medium-sized minnows and leafless crankbaits over 1 oz
- It can cast far against strong waves and winds, overcome all extreme situations, and overpower large fish comfortably

BC882M | Magic club

- Japan sea bass fishing exclusive rod that takes advantage of bait casting
- It provides the best comfort when retrieving Lure. (Lipless spintail, chatterbait, Scrounger Jig Heads, etc) Shows real face at unexpected hit moment

BIXOD EGGING E4 VER.2

Egging rods that meet all three factors: weight, strength and sensitivity. Blank, which blends graphene into Helix SNM, has strength and ultra-light, and shows amazing resilience when Jerking. The full carbon rear grip maximizes vibration to provide unprecedented sensitivity.

Blank material : 40TON~46TON high-elasticity CARBON + HELIX graphene
Blank : Helical core + HEXA CROSS + Rod Tip TOP SECTION (YSN 1K X-WRAP is wrapped around the surface)
FUJI GUIDE : Titanium "SIC" KR concept Guide
FUJI REEL SEAT : VSS16 + KDPS 16 IC/ASH HOOD
REEL SEAT BODY : BLACK COLOR Spray
Rear GRIP : Circular form CARBON GRIP
CARBON GRIP lower part anti-skid BLACK RUBBER Spray
Fore GRIP : BLACK Superstrong EVA GRIP
Lower aluminum parts : Graphene hexagonal shape cutting

S832ML

- It is designed to enable light jerking and sharp action, which is optimal for small action and fast pitch fishing
- It is highly recommended to Angler who uses 15g Egi as themain in pursuit of fast fishing

S892ML-M

- The difference in distance is the difference in results: the biggest factor for better performance than others in a breakwater crowded with many anglers is distance
- The repulsive force of new material graphene allows you to cast more elaborately further, and promises better results with excellent sensitivity

S812L-ML

- Delicate Jerking of 10 to 20 g of small Egi is available
- The charm of controlling Egi's action at will with its softness and excellent operability from a short Rod length

S852M

- A true all-round model that can be used in any situation, from spring to autumn, from 10 to 25g
- It has an amazing casting feeling and excellent sensitivity from the newly applied graphene material, and it has excellent performance that enables you to meet squid in any situation

FEATHERLIGHT & SENSITIVE BLANK

E2 -VER.2- TIP RUN EGING (BOAT EGING)

Blank material : 40ton high-elasticity CARBON + Helical core + X-WAVE
SOLID TIP : 30TON CARBON SOLID TIP
CARBON SOLID WHITE COLOR paint for visibility
FUJI GUIDE : "SIC" KR Concept guide
FUJI REEL SEAT : VSS16
FUJI REEL SEAT HOOD : KDPS 16P/ASH
REEL SEAT BODY COLOR Spray
GRIP : BLACK Superstrong EVA GRIP

S854ML-M | Two-Top Travel

- Folded length 68cm, two tips to maximize portability and functionality for travel Eging Rod. Solid Tip and Tubular Tip can be replaced. It is possible to cope with various demands in consideration of the difference of the region, place, weather etc. of all parts. Best model for overseas fishing.
- Use 15~20g of Egi, which has the highest frequency of use, for all-round use
- Provides a high-quality hard case : Easy to carry around with your shoulder

S812L-ML

- It is possible to manipulate the Egi below 15g technically as the user wants, and it has the best lightweight and overwhelming pressure in the lineup
- It is possible to experience the tip sensitivity that vividly conveys the movement of the small Egi, and the excellent resilience of the short blank which enables quick and sharp Jerking

S832ML

- The recent overall trend is that each user freely uses creative Jerk to approach target fish in various ways by season. With flexible tips, we prepared a sturdy blank with less loss in short and long Jerking operations

S842M

- The most standard model: seasonal, place, and local differences exist, but it shows casting performance and operability that suits its diverse needs
- Use 15~20g of Egi, which has the highest frequency of use, for all-round use

S872MH

- A powerful model that satisfies all the movements of Eging despite strong external loads in fields such as steep slopes, rapids stream, and complex seaweed
- When using large and fast Jerking action, it is possible to produce large and colorful movement of underwater Egi

S672L-ML-CST | TIP RUN EGING

- Bigfin leaf squid exclusive Rod for only shipboard Tip run Eging
- It is equipped with a taper that can see the most important squid movement in Tip run and to grasp the Bite with the eye
- The tip is so resilient that you can use it without stress even in fast Jerking action
- It is the most common specification for the 10m ~ 25m deep water layer in Korea. It is suitable for the operation of Egi for 30g~45g Tip run
- It is a model with excellent coping ability in various situations. It is optimal to attack and suppress large squid

TIP RUN EGING (BOAT EGING)

Since it should be easily accessible to anyone anytime, anywhere, we applied the finest blank to the entry-level to enhance operability and release it with the best quality in class. A combination of thin, soft tips and butts with strong strength. Blank with ultra-elastic multi-structure system boasts the best in its class.

- The 3D "Z" guide system has been adopted to improve the sense of loosening lines and casting ability
- Selecting the X-JOINT combination method, it is possible to overcome the weakness of loosening the combination during repetitive casting and Jerking, and to deliver natural power to the Taper
- The FUJI VSS reel seat doubles the power on the blank when held, and the handle with high-strength E.V.A and anti-skid cork mix grips enhances grip
- Designed with a low resin close to pure carbon, it has a good balance that easily grasps the bite of squid and reduces fatigue even in repetitive continuous Jerking action
- Considering the characteristics of the sea-only fishing rod, we packed it with a waterproof hard case and a cloth bag

Blank material: 30~40TON high-elasticity CARBON + helical core + Z-CT
FUJI GUIDE : Stainless "ALCONITE" Concept guide
FUJI REEL SEAT : VSS16 REEL SEAT + KDPS 16P/ASH HOOD

REEL SEAT BODY : AQUA BLUE Spray
ITEM : TIP 30TON CARBON SOLID / Use WHITE COLOR paint with visibility
GRIP : BLACK Superstrong EVA GRIP

S812ML

- It is easy to operate, and the continuous Jerk action using the Slack line makes Egi's movement appeal to the squid with certainty, and the soft tip reduces the sense of tentacles and brings excellent results
- It is easy to carry and move, so Egi fishing is easy and fun despite frequent location movements

S852ML

- It can be used in any Egi Fishing from Cuttlefish to Bigfin reef squid
- Moderately soft tips and strong Butts are very efficient for fishing in the fall season

S892M

- When the results are not good in coastal eging, products that can produce differentiated results to detect sensitive bites with long distance casting
- In addition to Egi, it boasts a progressive taper that can use a variety of Lures

We have adopted a soft solid tip that can detect squid deep in the rock when fishing on foot or on board.

팁이 들어가는 입질, 일어서는 입질, 흔들거리는 입질을 감지하고 훅셋 후 서서히 일어나는 강한 허리힘을 가지고 있는 제품입니다.

TIP RUN EGING (BOAT EGING) S692L-ML(CST)

- It is suitable for 15~20g Egi operation in the relatively thin depth of water layer. Products suitable for Tip run Eging by flow of the tide
- It is 206cm long and has excellent lightness and operability on the boat. It detects fine bites and has excellent ability to detect floor terrain

TIP RUN EGING (BOAT EGING) S742ML-M(CST)

- When bite, the tip responds smoothly and has excellent resilience, so it is effective in landing, targeting relatively deep water levels of 30m or more. Specifications suitable for Egi operation around 20 to 35g
- It has excellent coping skills in various situations and is optimal for targeting and overpowering large squid

NIXX EX Ink SQUID GAME 워킹 갑오징어

It is a sharp rod that reduces shaking for Webfoot octopus and cuttlefish fishing, the best fishing on the west coast and south coast. To accurately detect Cuttlefish and Webfoot octopus, we complemented usability in our existing Eging Rod or general-purpose Rod

INK S832M

- It is a specification suitable for a general pattern, which can feel the weight quickly and accurately during dragging
- Hard blanks have strong Butts that can land with fast and strong Hook sets

INK S842M-CST

- More sensitively grasping the sticky bites of squid by employing solid tips
- Strong Butt makes quick and easy landing with a fast and strong Hook set

S842M-CST(TIP SOLID)

S832M

NEW

NIXX POP EGING - VER.2-

The synthesis and application technology of composite materials have developed year by year, realizing incredible strength and weight reduction. We have achieved the best weight reduction in our class by reducing the weight of low-end products so that anyone can enjoy Eging

BLANK : 30~40TON high-elasticity CARBON BASE + helical core + Z-CT
S682L-ML (TIP RUN) :
30TON CARBON SOLID + WHITE Painting and Color Use for Visualization
KOREA Samyang GUIDE : "Zirconia" KTSIG Guide
FUJI REEL SEAT : VSS16 + KDPS 16P/ASH HOOD
REEL SEAT BODY : Purple COLOR Spray
GRIP : BLACK Hard EVA GRIP

S862ML-M

- The best power distribution for long casting and operability, strong distance & torque from strong Butt, and soft tips can also feel the weak tentacles's touch from far away

S802ML

- The length is short and anyone can easily manipulate

S832M

- The all-round model that can control 10 ~ 20g Egi freely with a light manipulation feeling from the optimal length, so that it does not cover the field and season

S682L-M

- It is the first Tip-Run rod in the NIXX POP series and is a powerful universal model that encompasses both deep and shallow depths with soft tips and strong Butt. It is 6 feet 8 inches long, not long or short, and is easy to use by anyone from beginners to experts

- Focuses on weight reduction and operability, and appeals Egi's movement to squid with Jerking action
- A soft tip increases the landing probability by reducing the sense of tentacles of squid
- Comfortable casting and Egi operation are possible when the field is limited (Fishing on board, etc)
- All-round models that can be used up to Cuttlefish and Bigfin reef squid for standard Egi operation of 15~20g
- It's flexible from tips to Butt, so it's excellent for casting and action management
- It has the power to operate heavy Egi comfortably, and difficult long-distance casting is possible
- It is possible to respond appropriately in the reef etc. where the needle well hangs. It has the powerful torque which it can catch the large squid or octopus.

Package : CLOTH BAG + PET CASE | Origin: Chinese local factories

can30 EGING

We lowered the wall of the luer entrance. We have made it easy for anyone to access the Rod, which is specialized in popular Bigfin reef squid fishing, at a reasonable price. We have been equipped with a product that is not lacking in operability, elasticity, balance, etc. by considering consumers who are exposed to squid fishing(Eging) for the first time.

- Blank : 24TON CARBON BASE
GUIDE : FUJI CONCEPT "O" GUIDE
• China vss16 REEL SEAT
Reel Seat : Anti-skid black rubber spray
• GRIP : Black Hard eva GRIP

S802ML

- With its high operability in light weight, it easily operates 5~15g small Egi
- It is suitable for casting a small Egi as well as delicately appealing to sensitive squid with a slack jerking by properly combining soft tips, so it is suitable for coastal squid fishing

S852ML

- Standard general-purpose models for all required movements, such as casting, Jerking, and landing
- Focusing on satisfying long casting and deep Jerking with the power that does not lack even the heavy 20g Egi operation

S902L

- Recently, it has been developed because of the need to appeal as much as possible and delicately in various domestic Eging fields.
- Even though it is the longest model in the lineup, large and soft casting and Jerking are possible. Rarely in 9-foot-long products, 5g small Egi can be operated effectively

Satisfaction enough even for beginners
CAN 30 EGING

NEW

BIXOD AJ3

The staff of JS Company [An Tae-ho] participated in the development directly and poured out his long experience and accumulated know-how. Ajing rod, which focuses on three things: ultra-light, high sensitivity, and perfect balance, has finally been born.

- Blank : 40~46ton high-elasticity CARBON + helix graphene + helical core + 5DS CROSS
30TON CARBON SOLID
FUJI GUIDE : FUJI "SIC" titanium micro guide application
FUJI GUIDE : 마지막 GUIDE T-ATSG titanium single foot guide

- FUJI REEL SEAT : FUJI VSS16 + KDPS16GM/ASH
REEL SEAT BODY Purple COLOR Spray
Aluminum BUTT CAP : Apply a vibration system for bite sensitivity
GRIP : BLACK Hard EVA GRIP

S582XUL-CST

- Apply the thinnest line diameter 0.7mm and the smallest FUJI micro guide with the idea of "to make an Ajing rod-like Ajing rod"
- Designed to have a very good overall balance as well as excellent sensitivity. A model to catch Jack Mackerel in the right size
- By adopting the Taper Solid Tip, it is easy to hit Jack Mackerel without having to set Hook quickly when the bite comes
- The tip is soft, so you can feel the thrill at hand when fighting, and the repulsion when landing is good, so the stability is also excellent
- Models for Only-Jack Mackerel Fishing

S622UL-CST

- Enhanced high sensitive rod with upgraded guide and balance in the existing AJ3 ver.1 S622UL model
- Micro guide is applied to improve the sensitivity of the existing AJ3 ver.1 rod, and the balance is also better.
- 3g of jighead can be handled without difficulty, so it is a recommended model to enjoy high-sensitivity fishing not only to the big jack mackerel but also dark-banded rockfish

S642L-CST

- When you always feel bored by catching the same size, let's catch Jack Mackerel
- It is similar to the S622UL model as a whole, but it is a stronger Ajing rod as the foreground and outer diameter increase.
- It has enough strength to throw even 5g without difficulty and is equipped with sensitivity to feel even small Jack Mackerel. If you want to enjoy Light Game with just one Rod, We recommend this model

It's like the most Ajing Rod

BIXOD VJ4

Blank material : HELIX SNM + high strength compression carbon
 • Silica nanomaterials can realize durability and power at the same time, making them optimal for jig fishing
 Blank mechanism :
 • HEXA CROSS CONSTRUCTION(six-axis) + SDS + SHDBased on the endurance and power of blank, the resilience of the material plays an important role in jigging fishing. VJ4 arranges muscular carbon fibers with persistence and strength to produce natural jig action. When fighting with big fish, the tremendous resilience of HEXA CROSS CONSTRUCTION works

Guide
 • FUJI's titanium frame TORZITE FLANGE ring was adopted for top guides and choke guides to eliminate the phenomenon of fishing lines being swept and broken, and to minimize damage to fishing lines by maximizing fishing line release and slipping
 • FUJI's new product, 3D TANGLE FREE Aroana TopGuide, is adopted to prevent the most perfect line twisting
 • Complete the optimal jigging spinning rod to ensure automatic line twist prevention and line release by adopting the 3D REVERSE CHOKING guide system
 Reel seat with double locking nut : No reel releases in action and fighting
 Future-oriented titanium mirror painting method :
 • First application in Korea. My favorite treasure for a long time

S54M

- It covers all fields and is designed as an all-round all-weather that does not give in to dealing with large fish and can operate up to 250g of Jig
- High Pitch Short-Jerking in shallow water depths and One Pitch Long-Jerking in deep water depths were designed to be possible
- A powerful model that hits with soft tip action and powerful butt power surely overpowers fish
- 10kg oversized Yellowtail Amberjack, Japanese Amberjack, and Greater Amberjack are targeted. It is designed to be able to land easily with overpowering based on powerful butt power

BC52MH

- For All-Weather Verticals aimed at All Fields in Korea
- Designed for the all-round, can operate up to 230g of lure
- Design for High Pitch Short-Jerk and One Pitch Long-Jerk
- Tip action to reduce fatigue from Jerking action, strong butt to ensure overpowering. Electric Fishing Reel available

BIXOD VJ4

1600 HBX-A 5.0 TORZITE-F Reverse Guide Irowana

S56MH

- Perfect for dealing with monster-class crouching in deepwater
- Spinning rod that enough to attract monster class by blowing vitality into jig even in deep water. No problem using up to 300g of Jig
- Through One Pitch Roll Jercking Action, it is designed to create strong butt power to successfully land large fish such as Yellowtail Amberjack, Japanese Amberjack, and Greater Amberjack over 10kg

BC50H

- Developed to operate up to 300g of lure to deal with monster class
- With a light weight of 228g, it minimizes the fatigue from fishing for a long time and provides the best fishing environment with strong butt power
- It is suitable for operating the long metal jig and it is easy to suppress the Yellowtail amberjack more than 20Kg
- Design considering the trend of increasing electric jiggng users and the use of electric reel

BIXOD VJ2

S-2 GLASS

Jiggng series with weight, balance, and strong butt. Flexible tips for absorbing and restoring the repulsive force of the jig reduce user fatigue. The flexible structure minimizes the occurrence of a broken fishing line or a needle falling out.

Blank material :
30~40TON High Elastic CARBON + Helical Core+ SHD + S2 GLASS
1PC TYPE
FUJI GUIDE : "K" concept ALCONITE GUIDE
SPIN FUJI REEL SEAT : DPSSD18 apply
BAIT FUJI REEL SEAT : PLSSD18 apply
GRIP : Superstrong BLACK EVA GRIP apply

SPINNING :
It is easy to cast, so the scope of search is slightly wider.
Action speed and height control are advantageous, and Spinning Reel's drag sound is a bonus.

BAIT CASTING :
more comfortable when vertical jiggng, and better to control

S56XXXH | BC56XXXH

- A model to respond to monster-class fish species in deepwater around 80m and rough fields. Flexible overpowering 10~20kg classes with highly resilient Butt
- Optimized for operation of semi-long jigs and long jigs of 150-250G according to jerk patterns

S58XXH | BC58XXH

- Focusing on various action operations such as One Pitch, High Pitch, Short Pitch Jerking
- Including bites in various situations through action changes according to the condition of the sea and fish group that change from time to time
- Optimized for operation of semi-long jigs and long jigs of 150-230G according to jerk patterns

SPINNING |

S60XH | BC60XH

- Induce bite by creating a natural action that seems to swim during tidal current or wind-induced diagonal zigging or casting
- According to the jerk pattern, 150 ~ 200G semi-long jig and long jig can be operated. It is suitable for the operation of tungsten jig which is active recently
- Optimized for operation of semi-long jigs and long jigs of 150-230G according to jerk patterns

BAIT |

 PAD EVA GRIP : Protection EVA GRIP that can protect between
 Fore GRIP + Real GRIP

BC622XH

- Suitable for 60~180g of Inchiku and slow jig operation.
- Development focusing on operability. Target: Olive flounder, Convict grouper, Groupers's sub family, Japanese seabream, etc
- Electric reel can be installed

BC612XXH

- 120~250g of slow jig and semi-long jig. Most suitable for Korean environment.
- Based on soft tips and strong butt power, it is possible to produce various Jerking action and has high pressure, so it can be used as an all-round. Target: Yellowtail amberjack, Japanese amberjack, Cod, etc
- Electric reel can be installed

BC632XXXH

- Suitable for slow jig operation of 180~350g
- A model developed to target large fish species or respond to fishing in extreme environments. It has tough power, so it can quickly overpower even in fighting with large fish species.
- Electric reel can be installed

Slim but powerful

Partial changes can be made without notice to improve the quality of the product | Origin: South Korea

BIXOD N J3

In order to develop a rod that is optimal for domestic field conditions and target fish, it has been tested harshly for more than six months and has strong butt power without wavering even in fighting with large fish. With 40 t of ultra-elastic carbon and Helix SNM, can easily overpower Yellowtail Amberjack over 1 meter. Soft tips, powerful Butt torque are designed to help induce the bite by creating optimal Slow-Jig action.

BC63XHB

- Optimal for 140g of Inchiku and 130g of slow jig operations Yellowtail amberjack, Japanese amberjack can be easily suppressed
- Suitable for shallow water in the 20~40m rangelt is also good for dealing with small and medium-sized fish such as Japanese seabream and Rockfish

BC63XXHB | BC662XXHB

- Optimal for slow jig operation of around 160g. Most suitable for Korean environment.
- All-round standard model that can easily produce various Jerking action Reduce the time to hit and land large species based on powerful butt power

BC63XXXHB

- The most powerful model that can suppress large Yellowtail amberjack or other large fish species without shaking even when Slow-Jigging over 200g
- Used in Slow-Jigging over 200g in areas with strong algae or step-sided. Based on fast action tips and powerful butt power, it is possible to produce various actions, increase the hit probability, and can suppress large fish species in a short time

※ Even in the actual test, the model had no problem overpowering the 120cm class Yellowtail Amberjack

Meet the great Koreans!
BIXOD N J3

One-piece

YELLOWTAIL AMBERJACK | JAPANESE AMBERJACK

BIXOD J2

Reflecting the needs of anglers who aspire to a reasonable slow jigging rod that suits the situation in Korea, we have created a powerful Gear that is easy to carry and functional. Developed as a portable handle separation type for the convenience of long-distance fishing trips. The best gift for away jigging fans by realizing lightening while maintaining one-piece action and power.

Blank material :

Ultra-high elastic carbon (40t) + high-strength carbon (30t)

- Using a 40t high-elastic carbon: It boasts a perfect torque for comfortable jerking and overpowering large fish by increasing bite sensitivity and floor sensitivity.
- The optimal structure realization by fully understanding the characteristics and functions of composite materials. Light weight, durability and power at the same time: so it has never been broken in many test processes.

Blank mechanism : HELICALCORE CONSTRUCTION + SHD

- The optimal structure realization by fully understanding the characteristics and functions of composite materials.
- Light weight, durability and power at the same time: so it has never been broken in many test processes.

Guide :

• FUJI TANGLE FREE "K" Guide and LDB Guide combination:

Apply a new concept guide that perfectly prevents PE line twisting.

Reel seat :

- FUJI's latest PLS blank touch type reel seat is adopted. Design to feel perfect reel grip and blank sensitivity by hand
- Achieved the best grip in Jerking and fighting for a long time during the actual field test process. Perfect grip design combined with comfortable handles.

642XXHB

- Suitable for slow jig operation of around 160g. The most optimal specification for the Korean environment that can target various fish species
- The standard for using various slow jigs' Jerking actions.
- Excellent torsion, bending, and resilience from the helicalcore structure, it can easily suppress the target fish by exerting strong torque during landing, and enjoy reliable jigging because of high fatigue strength
- Optimization for Semi-Long Jig and Long Jig 150 ~ 230G operation according to the jerk pattern

642XXXHB

- No difficulty in operating a slow jig of 200g or more in deep and tidal fields
- Application of Underlapping Method and Guide Array Designed by Flexural Balance. The most powerful specification that can be suppressed without any difficulty in dealing with large fish species including Yellowtail amberjack.

Light and comfortable fishing BIXOD J2

The Moment to Catch "CHARM N Black Label"

Confidence wraps around! Sense of technology!

It delivers vivid sensitivity as if you're touching it with your hands even if you can't see it. In 2021, High-End Rods Upgraded Once More, CHARM N Black Label

SYNAPSE + HELIX GRAPHENE
High sensitivity | Ultralight | High strength

CHARM **BLACK LABEL**

The perfect grip, for more

위해Most Rods have the advantage of being simple to assemble due to the "dimensionalization" of Reel seat and Grip, and have similar gripping effects by unifying the standards of Rod caliber and Reel sheat caliber for large-scale production.

[Perfect grip] Can't we make a rod with that? We first learned that the only way is to "unify" the Reel seat, trigger, and grip parts that are held in our hands. Over the years, we have developed the world's first [all-in-one reel seat] with a sense of grip that satisfies everyone through numerous tests and mold modifications. This was JS Company's technology and a feat that marked a new milestone in the global Rod development market. We name this proud technology [Synapes Technology].

Vivid sensitivity, one big sound

In the first field test with a rod equipped with an integral reel seat, surprise was expressed immediately, and that was "sensitivity." It was not intended, but it was the result of the development of [integrated reel seat]. The vivid "sensitivity" that could not be obtained from the current dualized reel seat, which offsets the sense of riding down the blank at the end of Rod, was clearly felt, and we began to work together with development and planning members to find ways to amplify this "sensitivity." First, it was urgent to find a grip that can feel the best "sensitivity" according to the characteristics without any incongruity in fishing by using all the same Rods made of different grips "Cork grip" and "Carbon grip" on the spot. The valuable conclusion from more than two years of field tests was [carbon grip].

However, when adopting the carbon grip, it was applied only to the "Fest Action" Rod, which focuses on targeting Bottom. However, carbon grip is not the only one applied to all rods. This is because different grips can be applied depending on Lure and environment in the future. All of these considerations are JS Company's strategic intentions to make the optimal Rod, and the pride of making it!

Application of advanced new material, graphene

적용The [graphene] added carbon fiber base film developed by JS Company is a [high-tech composite material] that increases the bonding force between fibers and carbon fibers dispersed in epoxy resin, reinforces the rigidity of the fabric by matching the directions of graphene and carbon fibers, and enhances the resistance to cracks.

The weight of the material was reduced by about 7% by applying it to the rod, the fracture strength was improved by about 10%, and a light and strong Rod was implemented. In addition, combined with the existing JS Company Nano technology, we have achieved the result of doubling Rod's performance and sensitivity!

NEW

CHARM N BLACK LABEL

 BUTT CAP : embossed BUTT CAP that makes the "N" mark stand out

BC642RSC

- A model to target sensitive Japanese seabream in the West Sea and South Sea. The ultra-slim blank of the 5:5 action provides the angler with an extreme of the thread at hand
- Identification of weak Bite and minimization of foreign substances in Tai rubber increase the probability of hookset
- As the depth of operation increases, the blank gradually operates smoothly, so that you can easily receive Bite regardless of size
- Suitable for driving around 40g of Tai rubber as a drift line technique and Retrieve

BC642JSC

- Flexible tips and Butts can suppress needle fall and create natural actions
- Overpowering quickly through exciting performances. It operates jigs and down shots of about 110g

BC652RSC

- Specifications optimized for seabream fishing in the West Sea and South Sea. A model that can be operated without difficulty at all depths
- Dynamic fishing is possible through flexible Butt
- Suitable for operating 60~80g of Tai rubber as a drift line technique and a retrieve

BC682JSC

- It is easy to grasp Bite with soft tips and can be quickly overpowered through strong Butt
- Suitable for operating heavy tackle of No.25~40 used in octopus, Olive floor, One line fishing, etc

BC672RSC

- Specifications optimized for seabream fishing in the southern sea and Jeju area. Up to 150g of Tai rubber can be used
- More effectively overpowering the seabream of the deep water with strong Butt
- You can use 80~100g of Tai rubber in various ways

BC662JSC

- All-weather specifications available in the West Sea, South Sea, and Jeju areas. Flexible tips dramatically improve Bite ability and prevent needles from falling off. Strong Butt is excellent in overpowering and coping with fast currents. Suitable for 60~100g of Tai rubber and No. 20 sinkers

INFORMATION | The design may be partially changed to improve product quality

Origin: South Korea

BIXOD C4

Blank material :

HELIX SNM + High strength compressed carbon

- Silica nano is the most suitable material for onboard fishing where toughness is important. Existing optimal material capable of simultaneously implementing durability and power

Blank mechanism: HEXA CROSS CONSTRUCTION(6-axis)

- A soft, hard, ultra-slim external diameter. A tip as soft as a solid guarantees a definite Bite. Blank, which has HEXA CROSS CONSTRUCTION (6 axes), has excellent resilience and can easily land large Japanese sea cream without shaking at all

FUJI PTS Reel seat :

Maximize the performance of the blank that can detect even small bites Future-oriented titanium mirror painting method : First application in Korea. My favorite treasure for a long time Guide

- FUJI's titanium frame TORZITE Guide was adopted : It eliminates the phenomenon that the line is swept away by the guide angle and breaks, and minimizes damage to the line by maximizing line release and slipping

- Complete the best shipboard rod to ensure automatic line twist prevention and line release by adopting the 3D REVERSE CHOKING guide system

Overcoming the limits of sensitivity with the evolution of materials!

Transfer by maximizing fine sensitivity through titanium top. It is designed to enable more delicate response to ever-changing sea conditions.

BC602 MT (TITANIUM TOP) | Cuttlefish

- You can hook up easily with minimal force with a firm Butt
- Butt, which is strong in favor of deep water and fast currents. It's strong against breaking tips by using metal top
- During a specific period, Cuttlefish does not Bite Egi well, and it is characterized by biting and unbaiting bait several times. It is easy to grasp the bite at this time and the Rod repulsion is not great, making it easy to land until the last time

Best sensitivity fishing BIXOD N C4

Advantages of the CHARM N C4 SPIRAL series

- HELIX SNM + high strength compression carbon : Add a spiral guide system to the blank with the best twist prevention and durability to further enhance its function
- The load is evenly distributed throughout Rod, and Rod work becomes easier when fighting with the target
- Baitcasting Rod's fast fishing management capability combined with the advantages of Spinning Rod's natural line release capability, increased bite sensitivity, and reduced string twisting

632RSC

- Masterpiece that will be the best gift for seabream fishing technician. Identify weak Bite and minimize the foreign body sensation of Tai rubber. You can feel the thrill at hand unique to seabream
- Appropriate specification for operating 35~40g of Tai rubber as a drift line technique

642RSC

- Optimal specifications for seabream fishing in the W and S Sea. It is convenient to operate not only in the deep water level but also in the shallow water level
- About 50g of Tai rubber drive line fishing and Bottom fishing are all possible

682JSC

- All-round model possible in all environments in Korea, including Jeju area. A model that can cover rubber jigging, downshot, cuttlefish and webfoot octopus fishing on board

BC664RSC | TRAVEL

- Folded length 58.8cm, seabream exclusive fishing rod for travel that maximizes portability and functionality
- Products that are convenient to operate in various environments such as the West Sea and Jeju Island. 50~150g of Tai rubber drift line fishing and bottom fishing are all available

652RSC SPIRAL

- Masterpiece that will be the best gift for seabream fishing technician. Identify weak Bite and minimize the foreign body sensation of Tai rubber. You can feel the thrill at hand unique to seabream
- Add a spiral guide system to maximize advantages such as line release ability, increased bite sensitivity, and reduced line twisting
- A suitable specification for operating about 30g of Tai rubber as a drive line technique

662JSC SPIRAL

- All-round model possible in all environments in Korea, including Jeju, with strong Butt and flexible tips. Models that can respond with various operations such as rubber jigging and downshot, including seabream as well as large fish species such as Yellowtail Amberjack and Japanese Amberjack

BC5112 FS-R | FULL SOLID

- A model prepared for wider fishing for anglers accustomed to Tai rubber
- Minimize Tai rubber's feeling of irritation when bite with extreme tapers and flexible tips unique to full solids
- Rod, which minimizes variables caused by high waves, further expands the world of Tai rubber

- Lure Rod on board for experts with light weight, operability, and portability
- Detachable handle type that realizes flexible force transfer such as one-piece
- FUJI's new "ECHO" guide : Eco-friendly and does not corrode by seawater
- FUJI ACS Reel seat : It is easy to lock and mount when the reel is mounted in the long nut method
- Robust underfoot wrap for heavy loads
- High density cork grip: Excellent durability and non-slip grip
- It is equipped with a locking function nut that satisfies the installation of reel without shaking despite strong fighting

- Applying the helical core method to respond with natural taper to any Bite from top to bottom. A product that rewards Seabream's sensitive Bite with excellent results
- The Cross Weave Winding method realizes the hardness and toughness of the blank at the same time, creating a natural movement
- Optimized weight balance to reduce fatigue even when fishing for a long time
- Good grip and completed design with high-quality natural cork and E.V.A grip
- Retrieve shaft (RSC) : Fishing focused on seabream. Excellent for octopus and cuttlefish on board
- Jerking shaft (JSC) : All-weather ship (Rockfish, flounder, seabream, cuttlefish)

CXT652JSC

- JERKING SHAFT - Light jigging (seabream, Yellowtail amberjack, Japanese amberjack, Rockfish, flounder)**
- A model suitable for 120g slow jig, inchiku, and tai rubber deep fishing
 - With flexible tips and strong Butt, which is optimal for jig operation, it is good at coping with high overpower and strong currents

CXT662JSC

- JERKING SHAFT - All Weather Rod (seabream, Rockfish, flounder, Cuttlefish)**
- It has a strong Butt, so it has strong overpower and responds well to strong currents
 - Soft and thin tips double Bite's ability. Butt Grip, which has little movement, is free to operate Lure despite deep water and strong currents
 - The best specification for 70g tai rubber and Inchiku Lure. You can control the down shot gear of more than 100g

CXT682RSC

- RETRIEVE SHAFT - seabream exclusive rod (seabream, Cuttlefish, octopus)**
- Designed with extreme soft tubular tips. It is excellent for the short Bite response of seabream
 - Natural action production is possible with the currents and wind of the sea
 - The thrill at hand is a good and easy-to-manage product.
 - It's best for 50g of tai rubber and Inchiku. It can be more than 80g

Package: High Quality Hardcase | Origin: South Korea

- Lure Rod on board for experts with light weight, operability, and portability
- Detachable handle type that realizes flexible force transfer such as one-piece
- FUJI "P" COLOR Alconite Guide : Excellent wear resistance and corrosion resistance
- Guide exclusively for PE Line : Natural transfer of Line
- FUJI ACS Reel seat : It is easy to lock and mount when the reel is mounted in the long nut method
- 큰 부하에도 견고한 발 밑 래핑 작업 실시

- E.V.A Grip : Excellent durability and excellent grip that does not slip
- Applying the helical core method to respond with natural taper to any Bite from top to bottom. A product that rewards Seabream's sensitive Bite with excellent results
- Optimized weight balance to reduce fatigue even when fishing for a long time
- Retrieve shaft (RSC) : Fishing focused on seabream. Excellent for octopus and cuttlefish on board
- Jerking shaft (JSC) : All-weather ship (Rockfish, flounder, seabream, cuttlefish)

CWR642JSS JERKING SHAFT | Spinning Rod

- All Weather Sea Rod (seabream, Rockfish, flounder, Cuttlefish, Cod)**
- With soft tips and strong Butt, this model has high overpower and excellent ability to cope with strong currents
 - Specifications that even beginners can easily enter the light jigging game
 - Quick Jerking, slow Jerking, lift & falling action, etc. Target various depths
 - The floor sensitivity is excellent, so delicate zigging fishing is possible

CWR672JSC 2절 CENTERCUT | JERKING SHAFT

- Light jigging (seabream, amberjack, Japanese amberjack, Cod, flounder)**
- A model suitable for slow jig, metal jig, inchiku, and tai rubber deep fishing around 140g
 - Elastic tips and strong Butt for jig operation.
 - Excellent ability to cope with high overpower and strong currents
 - Two-piece design for long-distance away fishing. It's easy to carry and store, and it's designed to maintain a one piece's taper

CWR652JSC JERKING SHAFT

- All Weather Sea Rod (seabream, Rockfish, flounder, Cuttlefish, Cod)**
- Blank of strong torque. It has good control and excellent coping ability even with strong currents
 - Various actions such as fast Jerking and slow Jerking can be targeted at various depths
 - Optimize weight balance. In energy-consuming zigging fishing, long-term fishing fatigue is reduced and the pleasure of fishing is doubled

CWR682RSC RETRIEVE SHAFT

- Japanese seabream exclusive rod (seabream, Cuttlefish, octopus)**
- Designed with soft tubular tips. It is excellent for the short Bite response of seabream
 - Natural action production is possible with the ever-changing currents and wind of the sea. Excellent sensitivity and easy-to-manage product
 - It's best for 60g of tai rubber and Inchiku. It can be more than 100g

CWR662JSC JERKING SHAFT

- All Weather Sea Rod (seabream, Rockfish, flounder, Cuttlefish, Cod)**
- It has a strong Butt, so it has strong overpower and responds well to strong currents
 - Soft and thin tips double Bite's ability. Butt Grip, which has little movement, is free to operate Lure despite deep water and strong currents
 - The best spec for 80g tai rubber, Inchiku Lure. You can control 130g or more of Down shot Gear

CHARM AIR

Blank material : Highly elastic carbon. + Helical core

- BC 672FS-R Blank : TIP SECTION 30TON CARBON ALL SOLID + High elasticity CARBON BASE
- BC 682ST-R Blank : TIP SECTION 30TON CARBON TIP SOLID + High elasticity CARBON BASE
- TOP : WHITE painting and ORANGE COLOR LINE for visibility

FUJI GUIDE : FUJI "SIC" K Guide

- REEL SEAT for Webfoot octopus, Cuttlefish : FUJI Separable Reel seat
- REEL SEAT for Tai rubber : FUJI PTSMK 17
- Grip : Side processing black super strong EVA grip to improve grip
- By hiring AIR VIBRATION SYSTEM BUTT CAP, Bite sensitivity is improved

BC642RSC | Tai rubber

- For lightweight Tai rubber with 40g to 60g
- It is possible to minimize the fatigue that can be felt in seabream fishing that takes a long time. Lightweight and highest elasticity that has never been before
- It does not lose its cheerfulness and operability throughout use, and immediately responds to seabream's unique Bite

BC662JSC | Universal

- A universal model that corresponds to most of the targets that can be targeted in Lure fishing on board. (flounder, Rockfish, seabream, Cuttlefish, octopus)
- More enjoyable fishing with light weight, elastic tips and strong butts

BC672 FS-R | Tai rubber : Full solid

- The basics of Tai rubber. Developed for anglers who prefer basic Retrieve techniques (full solid)
- Designed with a soft regular action, it can respond to seabream's sensitive and sharp Bite
- Due to the soft nature of full solids, it is possible to respond calmly to sudden Bite. It's advantageous to maintain tension after the hook set. we strongly recommend it to anglers who have anxiety about falling needles

BC652RSC | Tai rubber

- For about 70g of Tai rubber
- Maintaining the lightness of the CHARM AIR series. It naturally responds to strong currents and can be flexible but strongly overpowered in fighting with large seabream

BC632JSC | Downs hot

- It's suitable for hooking using a jig of about 120g. inchiku, and deep water down shot
- Heavy Gear easily accumulates fatigue, so ultra-light CHARM AIR becomes a reliable helper for users

BC682 ST-R | Tai rubber : Solid Tip

- The basics of Tai rubber. Developed for anglers who prefer basic Retrieve techniques (full solid)
- Designed to deliver strong force when hooking even in fields with a depth of 100m or more.
- Strong Butt and soft tips raise sensitivity to the limit. It delivers various information on the field to the angler even when deep water depth or Gear is flying far away

BC582M | Webfoot octopus 8:2 ACTION

- The explosive expansion of Webfoot octopus fishing created the need for professional rods
- Light weight and short length. It can be operated comfortably all the time
- Specifications suitable for the use of sinkers of No. 8~15 at depths of 5~25M. With its high visibility design and soft solid tips, it is easy to grasp even the fine weight

BC602M | Cuttlefish 9:1 ACTION

- Rod specialized in Cuttlefish fishing, which is difficult to find in Korea. Planning by prioritizing sensitivity so that it can respond immediately to sensitive Bite
- With its high visibility design and soft solid tips, it can be agile and accurate hooks even in fishing in fast currents and rough floor terrain
- With strong Butt, the success rate of overpowering and landing is high, promising improved results

NEW BC552ML | Cuttlefish 7:3 ACTION

- A model that increases sensitivity as much as possible so that you can feel the weight of Cuttlefish quickly and clearly by shaking and dragging
- Optimization for targeting relatively shallow water depths rather than deep water depths. The best sensitivity and balance when combined with sinkers No.12~15

Enjoy each use!

CHARM AIR IKA METAL

The most important sensitivity and operability in Mitresquid fishing were considered as top priorities. Carbon solid has been adopted to realize high sensitivity and promises stable landing and overwhelming results with slow tapered action.

Blank material : 30~40TON High elasticity CARBON + Helical core
ZERO TENSION Action GLASS SOLID TIP + Separable
GLASS SOLID WHITE Paintinf for visibility + Orange line applied
GRIP : BLACK Hard EVA
FUJI GUIDE : FUJI "SIC" K Guide

Guide arrangement method: Applied the spiral guide system.
Dot is displayed for guide alignment when combined with ZERO TENSION SOLID
GRIP : For middle EVA GRIP and rear EVA GRIP's grip EVA side processing
Aluminum BUTT CAP : Apply vibration system for Bite sensitivity
PAD EVA GRIP : Apply a protection EVA GRIP that can protect between middle GRIP + rear GRIP

BC632ML | SPIRAL

- Rod for IKA Metal, which deals with metal Egi ranging from 40~60g
- Using Rod's short Real Grip in a situation where squids are gathered at a shallow depth of 5 to 30 meters in the night squid onboard fishing. Aggressive IKA Metal Rod, which induces bites by increasing the frequency of attacks on squids that do not rush easily.
- Adopting a spiral guide to reduce line twisting and damage that can occur when shaking the rod

S682M

- Diversify the user's choice as a spinning rod used with a spinning reel
- It is superior to Bait Rod in terms of casting and manipulation. Showing outstanding performance at Bite at shallow water depth

BC682M-MH | SPIRAL

- It also has the best sensitivity for deeper water depth and use of IKA metal over 75g
- Day and night all-round Rod. In particular, it has an action and sensitivity suitable for targeting fish species with a depth of 60M

NEW BC512MH | ZERO TENSION

- Adopting a unique tapered glass solid called "zero tension technique." When you get off Gear into the sea, the tip stands close to the 90 degrees at a certain point, making it easy to grasp Bite
- Even if the ship is shaken by waves or wind, only the rod's tip remains upright, so you can see the tip and identify the Bite, and fish easily
- It's better to use it with a holder than holding it yourself

CHARM AIR SEA LIVE OCTOPUS HAIRTAIL

Blank : Highly elastic carbon + Helical core
TOP : WHITE PAINTING + ORANGE COLOR LINE is adopted for visibility and identification
FUJI GUIDE : FUJI "SIC" K Guide
REEL SEAT : FUJI Newest PULSMKP 17 (It has a good gripping feeling in the form of a long trigger and is not tired of fishing for a long time)
Grip : Side processing black super strong EVA grip to improve grip
By hiring AIR VIBRATION SYSTEM BUTT CAP, Bite sensitivity is improved

Sea Live

BC672MH | One line fishing

- One line fishing rod designed to effectively target Japanese sea bass and Brown croaker. It is designed to be 67" shorter than the general length of existing products to significantly improve operability
- Best for catching a fish hidden in a broken artificial reef or on a reef. Precisely detect intermittent Bite
- Flexible tips make it easy to identify Bite and at the same time boast overwhelming power with a very strong Butt

BC662XH | Octopus

- Considering the characteristics of octopus fishing in the southern part of the country, it focuses on strong overpower
- Lightweight and comfortable grip design, a common feature of CHARM AIR. Promise of the best results by applying a strong blank for gear operations of about 100~200g and Kg target fish species

NEW BC602MT | Octopus (Titanium TOP)

- A more sensitive, flexible, and balanced octopus rod. Respond flexibly without breaking using titanium solid tips. Taper expression is free, so even small Bite can be caught. Best for octopus fishing from the beginning to the end of October

Octopus

BC682MH | Octopus

- The best specifications for octopus fishing enthusiasts
- It is suitable for octopus fishing in the coastal area and has excellent operability, so you can enjoy Fun fishing while maintaining a steady condition for fishing for a long time

Hairtail

A dedicated rod for hairtail jigging, which has recently been in the spotlight. Sensitivity and action were considered as the top priorities. Designed to deal with all sizes from baby to monster. It is a rod that maximizes the enjoyment of hairtail Jigging that cannot be felt in raw bait fishing, promising stable landing and improved results with slow tapered action

BC632M | Hairtail Jigging

- In night fishing, targets are gathered at a shallow depth of 10 to 30 meters, or when the bite is weak, use a light Jig to induce bite by giving strong action
- Bite, Hooking, Landing, Rod where you can enjoy the unique fighting of hairtail with your eyes from the handle to the tip

BC682MH | Hairtail Jigging

- Day and night all-round Rod. Especially suitable for 120g Jig to target fish or monster-sized targets over 50m deep. (100~200g of jig can be operated)
- Even in deep-water fishing, Jig action was considered not to be too noisy, and the fatigue was minimized by designing the jig to be easy to operate

Different types of fish

CHARM AIR TENYA

Strong Butt and Titanium Tips(High sensitivity, memory alloy material) for Largehead hairtail Tenya Fishing. It is a full-fledged Largehead hairtail Rod that delivers even fine Bite.

BLANK : 30~40TON High elasticity CARBON + Helical core
TITANIUM TOP + Orange line for visibility
GRIP : BLACK Hard EVA
FUJI GUIDE : FUJI "SIC" K Guide
S752L-ML-MT REELSEAT : FUJI VSS16 + KDPS16P/ASH / VSS16 BODY Spray

BC602M-MT REEL SEAT : FUJI PTSMPK 17 / Spray
BC602M-MT Guide arrangement method : Applied the spiral guide system
GRIP : For middle EVA GRIP and rear EVA GRIP's grip EVA side processing
Aluminum BUTT CAP : Apply vibration system for Bite sensitivity
PAD EVA GRIP : Apply a protection EVA GRIP that can protect between middle GRIP + rear GRIP

S752L-ML-MT(TITANIUM TOP) | Largehead hairtail Tenya

- The prototype was made by applying solid tips, but due to its large population and frequent Bite, the breakage rate of Rod increases due to sudden hooking and radical hooking behavior. Accordingly, a model that reduced the breakage rate as much as possible by applying a metal solid tip
- Apply soft taper to detect Bite and make hairtail feel less incompatible

BC602M-MT(TITANIUM TOP) | Largehead hairtail Tenya (deep sea)

- Specifications that can be operated from No.30~60 sinkers. It is equipped with a strong Butt that responds to deep dragon-class hairtail
- The shape memory alloy titanium top and flexible tip are perfect for attacking hairtail with clear Bite expression

NEW

S2 SLIME

S-2 SLIME ROAD series using a material having a new characteristic that is glass-like but not glass-like. It brings the taper and toughness and lightness of the glass and has the sensitivity of carbon.

BC622JSC | Universal

- It suits anglers who prefer light jigging and light action downshot Rod. With glass-specific taper, stable landing of target fish species is possible, and the thrill at hand is provided

BC642RSC | Japanese seabream

- Recommended for those who want more extreme taper than full solid
- There's a glass-specific taper, but the transmission of the lines to Rod is similar to that of carbon rods, but it feels tougher
- Recommended to anglers who are tired of the existing tai rubber model

BLANK : 30TON High elasticity CARBON + S2-GLASS + Helical core
Handle separation type 2PC TYPE
KOREA SAMYANG GUIDE : "Zirconia" KTSIG + KWSIG Guide
Guide arrangement method: Applied the spiral guide system
FUJI REEL SEAT : ECS16 + KDPS 16P/ASH
REEL SEAT BODY : ORANGE COLOR Spray
GRIP : Hard BLACK EVA GRIP
Rear EVA GRIP : EVA GRIP side processing for gripping
PAD EVA GRIP : Apply a protection EVA GRIP that can protect between middle GRIP + rear GRIP

S2GLASS210 | Korean Rockfish

- A short version of the 210 model. With a soft tip using S2 glass, the bait goes into the mouth softly so that the target fish species does not feel burdened during Bite, but it is possible to accurately hook the target's mouth
- Using carbon-like glass, sensitive tip and powerful Butt are characteristic, making it easier to land on the target

NIXX ocean -VER.2-

Series optimized for the fishing style of middle and upper class in cephalopods fishing. Designed with a soft to mid-hard rod propensity in consideration of the user's taste. Adopt sensitive tips to deliver Bite and weight optimally.

- Handle separation type
- Strong power, 7:3 taper
- It's easy for anyone to use

Blank material : 30TON CARBON BASE + Helical core
 Handle separation type 2PC TYPE
 GUIDE : FUJI ALCONITE RING "K" Concept Guide

Guide arrangement method : Spiral Guide System
 TOP SOLID : GLASS SOLID + WHITE COLOR Painting with good visibility
 REEL SEAT : FUJI ECS16 BAIT REEL SEAT + KDPS16P/ASH HOOD
 REEL SEAT : BLACK Spray
 GRIP : Superstrong BLACK EVA GRIP
 Two-tone Aluminum Anodizing
 PAD EVA GRIP : Apply a protection EVA GRIP that can protect between middle GRIP + rear GRIP

BC632JSC | Flounder / Rockfish / Cod / Grouper / Amberjack

- Suitable for downshot operation of 130-150g. Take a down shot using a strong Butt and an elastic tip.
- A model that clearly distinguishes between the sensitive Bite of the flounder and the rough floor feeling. A product with excellent overpower that can withstand deep water and strong currents. Elastic tips prevent the target from pulling out the needle.
- It can be used not only for down shots but also for 100-150g slow jigs and inchiku, and can also target migration fish species below the meter-sized.

BC662JSC | Korean Rockfish / Flounder / Seabream / Small rockfish

- It can be operated on 60-120g of Tai rubber, down shot, and slow jig using a tip that bends smoothly and a strong Butt.
- Item suitable for bottom fishing of less than 40m. It is good to enjoy various gears in many ways.
- You can enjoy heavy Tai rubber and downshot together. A model you need when you start fishing on board with just one rod.

BC622MH | Octopus

- Overall, it has a strong taper and is the shortest model among our company's octopus-only rods.
- It targets octopus from Yeosu, Buan, and Gunsan. You can use more than 150g of gear without any burden.
- It can overpower target of kilogram-size or higher and immediately respond to Bite of target with strong tension.

BC602ST | Cuttlefish

- Suitable for light sinker use in units No.8-15. It is a model with sensitive tips and strong Butt, and has optimal Bite sensitivity when the water surface and fishing rod maintain an angle of 40 to 60 degrees. Good visibility by using white tips.
- A model specialized in the sand and mud fields, and a rod for superiors who need accurate hooksets.

BC622ST | Cuttlefish

- It is suitable for the use of No.3-20 sinkers and has sensitive tips and strong Butt.
- It is similar to the existing Cuttlefish models, but it adopts a longer and softer tip to feel the weight of cephalopods.

NIXX POP ocean ver.3

Basic models of onboard fishing that can generally be encountered along the coast, such as Olive flounder, Korean Rockfish, Japanese sea bream, and Mitre squid. It's a suitable fishing rod for beginners.

Blank material : 30TON High-elasticity CARBON + Helical core
 BC672M-MH-CST ITEM : TIP CARBON SOLID
 Handle separation type 2PC TYPE (CENTER CUTT)
 FUJI GUIDE : "O-RING" Concept Guide
 FUJI REEL SEAT : ECS16 + KDPS 16P/ASH
 REEL SEAT BODY : COLOR Spray
 GRIP : Superstrong BLACK EVA GRIP
 Rear EVA GRIP : EVAGRIP side processing for gripping
 PAD EVA GRIP : Apply a protection EVA GRIP that can protect between middle GRIP + rear GRIP

BC662JSC | Universal

- Universal (Korean Rockfish, Flounder, Seabream, Small rockfish.) : Jerking**
- Strong Butt and hard specs are excellent in coping with deepwater depth and strong currents, and excellent in overpowering
 - A model suitable for 40-100g tai rubber, slow jig, metal jig, and Inchiku.

BC642RSC | Japanese seabream

- Japanese seabream : Retrieve**
- It has good operability for 40 to 100g of Tai rubber. Minimize fatigue from long-term fishing
 - A model with excellent Bite ability with soft taper and strong Butt

BC652M-MH-CST | 한치(SOLID TIP)

- Mitre squid Metal Jigging**
- Metal Jigging model targeting Mitre squid with a slow action ratio of 7:3
 - It's good for light metals of 20 to 30g and for using more than 60g
 - Hiring tips with high visibility

BC632JSC | Down shot

- Down shot (Flounder, Rockfish, Cod, Grouper, Amberjack) : Jerking**
- A model suitable for deep water depth and strong currents and easy to operate a heavy Lure
 - Excellent overpowering power by flexible tips and Butt
 - Tai rubber, Inchiku, and Downshot Gear can be used in general

BIXOD

Ink SPIRAL

TITANIUM

Korea's first fishing rod with carbon grip and titanium tip. The touch-type reel seat makes you feel sensitivity and weight better. The combination of sensitive titanium tips, tip tapers, and strong Butt quickly catches the weight of cephalopods, providing accurate hooks and stable landing.

Blank : 30TON High elasticity CARBON + Helical core
TITANIUM Tip TOP + Orange line for visibility
GRIP : BLACK Hard EVA + circle CARBON GRIP + Air vibration.
KOREA SAMYANG GUIDE : "Zirconia" KTSIG + KWSIG Guide
REEL SEAT : NEW BAIT REEL SEAT

REEL SEAT BODY + HOOD :
BLUE GREEN COLOR Spray + Anti-slip RUBBER Spray
Guide arrangement : Spiral guide system
GRIP : Middle EVA GRIP Processing the side of EVA for gripping
Aluminum BUTT CAP : Apply vibration system for Bite sensitivity.
PAD EVA GRIP : Apply a protection EVA GRIP that can protect between middle GRIP + rear GRIP

BC562MTC | West Sea Cuttlefish

- Webfoot octopus and cuttlefish in the West Sea are targeted. The taper is 9:1, but the entire tip bends in a balanced way.

BC582MTC | Southern sea Cuttlefish

- It targets fish species deep in the South and West Sea regions. Stronger Butt with 8:2 taper. A model that can target even octopus at the beginning of the season.

SPIRAL BC502M | Webfoot octopus (8:2 action)

- Specifications suitable for using sinkers No.8~25 at a depth of 5~25m.
- It has a high visibility design and a soft solid tip to easily grasp the fine weight.
- Short length of 5' and comfortable operation for all the time.

SPIRAL BC582M | Cuttlefish (9:1 action)

- Rod specialized in Cuttlefish fishing, which is difficult to find in Korea. Planning by prioritizing sensitivity so that it can respond immediately to sensitive Bite.
- With its high visibility design and soft solid tips, it can be agile and accurate hooks even in fishing in fast currents and rough floor terrain.
- With strong Butt, the success rate of overpowering and landing is high, promising improved results.

BC502M (8:2 action)

- The explosive increase in Webfoot octopus fishing has raised the need for specialized Rods.
- Specifications suitable for using sinkers No.8~25 at a depth of 5~25m. It has a high visibility design and a soft solid tip to easily grasp the fine weight.
- Short length of 5' and comfortable operation for all the time.

BC582M (9:1 action)

- Rod specialized in Cuttlefish fishing, which is difficult to find in Korea. Planning by prioritizing sensitivity so that it can respond immediately to sensitive Bite.
- High-visibility design and soft solid tips allow agile and accurate hooks even in fishing in fast currents and rough floor terrain.
- With strong Butt, the success rate of overpowering and landing is high, promising improved results.

NEW BC582MH | Octopus

- Model suitable for all seasons of the west coast and south coast. Overall, strong Taper's octopus Rod.
- Specification for catching octopus weighing more than 4kg. Using solid tips on strong butts, you can cover from small octopus to large octopus from August to December.
- It is suitable for octopus fishing using heavy gears for a long time by using PLS Reel seat that withstand heavy loads.

NEW BC602XH | Octopus

- A model that can target Octopus vulgaris and Octopus dopleini weighing more than 4 kg after October.
- It is 6' long and has excellent operability, and the thin solid tip quickly detects the weight of the octopus.
- Targeting the octopus in the West Sea, South Sea and East Sea

can30 ocean

Ship rod series developed for beginners. A thin but strong blank. It is a specialized specification for each fish species and helps to adapt quickly to the first onboard fishing.

Blank material : 24TON CARBON BASE
 BC522M / BC542M / BC622MH : TOP GLASS SOLID
 BC522M / BC542M : Spiral guide system
 센터컷 2PC TYPE
 GUIDE : FUJI "O" RING Concept Guide

REEL SEAT : BAIT REEL SEAT
 REEL SEAT : COLOR Spray
 GRIP : Hard BLACK EVA GRIP
 Two-tone aluminum anodizing technique

BC622RSC | Seabream

- Short and balanced blanks for beginners
- Produced by considering the weight of Tai Rubber, which can be used universally in the West Sea, and minimizes fatigue.
- You can catch intermittent Bite with a soft tip and overpower the target fish species without difficulty.

BC522M | Webfoot octopus

- Short, easy-to-operate, onboard webfoot octopus exclusive model.
- It uses a thin solid tip of 8:2 to increase visibility and catch light weights.
- It's easier to hook and land by using Butt Taper, which is stronger than Tip.
- Optimal taper for Webfoot octopus living less than 30 meters.

BC632JSC | Olive flounder

- The most popular proven rod length is adopted.
- A model that can be used anywhere in the West Sea for downshot and light zigging.
- It has a strong Butt, so it can overpower the target fish species despite strong currents and deep water.
- It maintains strong overall tension and makes it easier to identify Bite quickly

BC542M | Cuttlefish

- Short, easy-to-operate, onboard Cuttlefish exclusive model.
- By adopting solid tips of 7:3, you can increase visibility and respond more flexibly to waves.
- Sensitive Bite can be quickly identified, and it's easy to hook up accurately.
- You can see the Bite right away even at a depth of 50 to 70 meters.
- Inexpensive, but anyone who gets used to manipulation can get great results.

BC642JSC | Universal

- Universal model with a shorter length than before. Maximize operability.
- Necessary when targeting various fish species with one rod.
- Strong Butt and Flexible Tip - Light Zigging, Tai rubber and Downshot Available
- It can be used in the inner bay of the West Sea and has excellent Bite sensitivity.

BC622MH | Octopus

- It has become more comfortable by adopting a shorter length than before.
- Although it has a strong Butt, it employs a solid tip of 8:2, making it easy for anyone to catch the target.
- It is not too much to use 150g of Gear, and it is strong and fast to cope with target.

NEW

BIXOD P4 -VER.2-

All migration fish species that can be found in domestic and foreign casting games are targeted. It was reborn more strongly through the upgrade of four years. The basics of the casting game is "Power vs Power." You must be able to catch it with a powerful Butt, not dragged by fish. Overpowering power that does not match the cheerful manipulation. It is designed to reduce fatigue even after fishing for a long time through lightness and optimal balance, allowing countless casting on the field.

Blank material : 40ton high-elasticity CARBON + helix graphene + helical core + HEXA CROSS
 FUJI GUIDE : FUJI "SIC" KW Guide
 FUJI REEL SEAT : FUJI DPSSD20GM + anti-release FUJI NUT LOGR20/AN
 GRIP : BLACK Hard EVA GRIP
 FUJI Rubber Gimbal Butt CAP
 Aluminum parts : Graphene hexagonal shape cutting process

P862XH

- Casting model for all fields. The main target is Yellowtail Amberjack, Japanese Amberjack, and large Spanish markerel over 15kg.
- Rod exclusively for all-round casting, which is optimal for the operation of pencils and poppers ranging from 60 to 75g and can operate up to 100g.
- Optimization for diving action that induces Bite after Retrieve. Delicate and soft tips maximize the movement of the pencil as if it were moving alive, creating frequent Bite.

P1002H

- A long-casting model that can cover all fields from seashore rock to shipboard. The main targets are Yellowtail Amberjack, Japanese Amberjack, and Spanish markerel, which are medium and large migratory fish species.
- It can be used from casting jig to 120g pencil. It's designed to be more advantageous for Jigging the rocks on the seashore than on board.
- Various actions such as Jerking, Twitter, and Retrieve are possible. It can increase the casting distance with soft tip action and strong Butt while clearly overpowering the target fish species.

P832XXH

- All-round model for monster class. Yellowtail Amberjack with 20kg overweight and Tuna with 130kg overweight are the main targets.
- Optimal for operation of more than 100g of pencils and poppers, no burden at all on operation of more than 130g.
- Developed for the purpose of using various actions of the pencil. It adds fun to big games with its cheerful operation and is designed so that you don't feel tired even after casting for a long time.

NEW

BIXOD P2 -VER.2-

It's an item made for Yellowtail Amberjack and Japanese Amberjack popping fishing in Korea. It is equipped with high overpower and long range by reinforcing the insufficient Butt power in the existing P2.

Blank material : BLANK : 30~40ton high-elasticity CARBON + helical core
 FUJI GUIDE : FUJI "ALCONITE" KW Guide
 FUJI REEL SEAT : FUJI DPSSD20 + anti-release FUJI NUT LOGR20/AN
 GRIP : BLACK + GREY Hard EVA GRIP
 FUJI Rubber Gimbal Butt CAP

S862MH-H

- Tip is designed to be soft and Butt is designed to be strong. A relatively lightweight Popper and pencil bait can also be cast without any problems

S882H

- Improved the existing 862H model. It has a stronger Butt, so you can cast a plug of 100g without difficulty

S902H

- Cast more than 110g plugs that require a distance without difficulty. Fast suppression with powerful Butt force

Upgrade Stronger
BIXOD P2

BIXOD SJ2

Lightweight light jig and popping special model based on BIXOD P2. It is a model optimized for large mackerel and medium-sized fish species by inheriting the positive reviews of P2 and has advantages of light weight and strong Butt.

S902MH/E-F | Center cut

- Long casting from strong Butt has the advantage, suitable for mid- to large-sized fish species off shore on board.
- Light weight and high elastic blanks minimize user fatigue. With strong resilience, it is more advantageous in overpowering the target fish species
- Target medium and large macarels using high weight Lure.
- Especially during Offshore Jigcasting, we promise a better distance.

NEW S792M-F | Handle separation type

- Rod exclusively for medium and large Macarels on board. Maximize operability and accurate casting. The most versatile model with a flexible and powerful upgraded Butt.
- Use 40 to 100g of Lure.
- You can enjoy a fight with a target fish species through MF action. When using Jig, Rod's resilience enables more comfortable action. Use soft tips to prevent needles from falling out.
- The Rear Grip part, which fits the Korean body type, is comfortably adhered to the fighting belt and the armpit position

S762M/F | Handle separation type

- Rod for onboard fishing using 40 to 60g of Lure. Suitable for targeting large mackerel and medium-sized fish species.
- You can enjoy a fight with a target fish species through MF action. When using Jig, Rod's resilience enables more comfortable action. Use soft tips to prevent needles from falling out.
- The Rear Grip part, which fits the Korean body type, is comfortably adhered to the fighting belt and the armpit position

S802M/F | 핸들 분리형

- All-round products that can be used in various Lure such as 50 to 80g of jigs and plugs on board and off the coast. Anyone can easily cast and the guide is arranged in consideration of the installation of medium and large class reel.
- Even in situations such as large Olive flounder, Japanese sea bass, and medium-sized Japanese Amberjack, Yellowtail Amberjack Offshore fishing, it can be quickly overpowered with excellent resistance and resilience.

NEW S832M-MHF | Center cut (PUT IN TYPE)

- The most versatile model with a flexible and powerful upgraded Butt. It complemented its excellent distance and accurate casting
- All-round products that can be used in various Lure such as 50 to 100g of jigs and plugs on board and off the coast.
- Considering the installation of medium and large-sized reel, the guide arrangement and the optimal guide size are upgraded.
- Even in situations such as large Olive flounder, Japanese sea bass, and medium-sized Japanese Amberjack, Yellowtail Amberjack Offshore fishing, it can be quickly overpowered with excellent resistance and resilience

BIXOD R4

Blank mechanism

- **HELLICAL CORE CONSTRUCTION** : The helical core structure, applied both inside and outside the blank, binds the opposite material together: maximizing instantaneous torque and hookset capabilities
- **HEXA CROSS CONSTRUCTION** : The ultra-high elastic CLOTH (4 shaft) is united with the helical core (2 shaft). It prevents to be cut the minute fiber and the fatigue strength is enhanced and sensitivity and intensity are raised at the same time. Maximize long-distance cast ability and landing ability by enhancing resilience and repulsive power in coastal rockfish fishing EQUIPMENT
- **FUJI titanium torzite Guide** : The ideal guide that combines a titanium frame with a torzite ring. Maximize the performance of Rod, Reel, Line and realize ultra-high strength, ultra-thin, ultra-light, ultra-low friction to the limit
- **NON SLIP RUBBER EVA GRIP** : It does not change even after repetitive action, casting, and years of use
- **FUJI newest Spinning reel seat (NON SLIP RUBBER FINISH)** : FUJI TVS(Tight V Shape) newest Spinning reel seat apply. Double Touch Blank Design: Senses extremely fine rockfish's bite
- **Two-tone aluminum anodizing technique**

Characteristics of Rockfish Rod

It is common to employ solid tips because rockfish rods have to be designed smoothly due to their characteristics. However, if it can be equipped with a very thin and soft tubular tip, it will perform superior to solid tips in many areas, such as increasing Bite sensitivity and reducing weight. The BIXOD R4 series rod employs a phenomenally thin tubular with a tip diameter of 1mm, while maintaining the same softness as a solid tip, increasing sensitivity and reducing weight.

S752UL

- A model with high versatility. You can use it in various places such as rocks on the seashore and breakwaters.
- Easy to operate a light jig head. cast with soft but elastic tips and Butt, you can get a big distance even with small recoils. It can be applied not only to rockfish but also to various genres such as Beka square, Japanese flying squid egging.
- The soft and strong Butt is also excellent in coping with unexpected large targets.
- A soft but strong rod that can induce the bite of rockfish, which is less active in a low temperature.

S732UL

- Model that combines the shortest length and soft tip and blank in the R4 series. It's designed to make it easier to cast light jigheads. It has excellent operability due to its short rod length, so it is suitable for producing action of jigheads and other lure.
- A model that reduces fatigue in rockfish fishing, which requires hundreds or thousands of casting overnight, and can be easily cast even by a somewhat weak female angler.

S782L

- A product developed under the goal of "overpowering large Rockfish." A rather soft tip makes it easy to secure casting distance, induce bite, and easily overpower with strong Butt strength.
- Suitable for operating casting balls for rockfish. It is a model that can operate up to a rather heavy jig head of about 10g, and it is easy to operate hardbait such as metal and minnow, and the Bite sensitivity is also good.
- It's easy to overpower rockfish who resist until the end in areas with many obstacles such as Tetrapod as well as Offshore.
- It boasts a strong Butt that can catch not only dark-banded rockfish but also large rockfish such as Marble rockfish, Sebastes oblongus, and hexagrammitae.

S832L

- It is easy to cast from a long distance using a casting ball under the motif of "Targeting a large ultra-long distance Rockfish." Strong Butt that can overpower any big target. Soft and strong tips enable somewhat light jighead operation and long-distance casting using centrifugal force of a long rod.
- Although the lightness of the high elastic carbon and Helix SNM is a rather long model, it provides light and comfort to anglers, and you can feel the best performance in a match against large rockfish.

BIXOD R3

As the public interest in rockfish fishing increased, it was necessary to develop a rod considering the tendency of various users. The most comfortable form that can be obtained from nature to satisfy all users with different shapes of hands was "egg". Based on the egg shape, the handle of the design minimizing the fatigue considering the grip of various users was created. We have achieved a clean design, lightweight and sensitivity that is faithful to the basics.

Blank material : Helix SNM 1000 + ultra-high elastic carbon(40t)

- Helix SNM : It makes the compressive strength and the impact strength which is the disadvantage of the ultra-high elastic SHEET strong.

Blank mechanism

- **HELLICAL CORE CONSTRUCTION** : The helical core structure, applied both inside and outside the blank, binds the opposite material together: maximizing instantaneous torque and hookset capabilities
- **5DS CROSS CONSTRUCTION** : The ultra-high elastic CLOTH (3 shaft) is united with the helical core (2 shaft). It prevents to be cut the minute fiber and the fatigue strength is enhanced and sensitivity and intensity are raised at the same time. Maximize long-distance cast ability and landing ability by enhancing resilience and repulsive power in coastal rockfish fishing.

EQUIPMENT

- **FUJI titanium KR Guide**
- **NON SLIP RUBBER EVA GRIP** : It does not change even after repetitive action, casting, and years of use
- **FUJI IPS Spinning Reel seat + KDPS16/ASH IC COLOR HOOD**
- **Two-tone aluminum anodizing technique**

S752UL | 솔리드 팁

- Rockfish rod, which adopted solid tips for the first time in our company, accepting the needs of many anglers. It also senses sensitive Bite when Beka squid vertical egging on a ship or a supporting board.
- It was born after many development tests to complement the characteristics of the soft but easy to shake Solid rod. A rod which can feel the softness of the solid tip and the bite sensitivity of the tubular tip together

S782L

- Rod, with a focus on the far-off cast: thin but strong Butt.
- A soft, resilient blank. A model that can combine casting of light jighead and long distance casting using casting ball. Butts an advantage that can easily suppress large rockfish
- HelixSNM + Titanium Guide : It's a bit long, but doesn't feel too heavy, and boasts operability that is close to general purpose.

BIXOD R2 -VER.2-

"add new technology to luxury goods". BIXOD R2, which has been loved since its birth in 2012, has been upgraded to Ver.2.

- "SPIGOT JOINT" for the first time in the JScompany rockfish rod. Soft curves and sharp joints.
- Sharper blank that gives "casting performance that seems to cut the wind" and has an stands out aesthetic element.
- The "BIXOD R2 ver2", which is lighter than the ex-model, reduces fatigue even at all night casting and reduces the wrist's fatigue.
- In addition to functional factors, the "reel seat painting of the latest technique" maximized aesthetic sense and increased overall completeness.

Blank : 40t High-elasticity CARBON + Helical core
 S752UL-CST : 30TON CARBON SOLID TIP
 CENTER CUT "SPIGOT" combination method
 FUJI Guide : FUJI "SIC" KR Concept Guide
 FUJI REEL SEAT : FUJI VSS16
 REEL SEAT HOOD : KDPS 16P/ASH
 Reel seat COLOR : REEL SEAT BODY COLOR Spray
 GRIP : BLACK Hard EVA GRIP

S732UL

- Focus on manipulation, shortest model in the series
- It also shows advantages in dark-banded rockfish fishing on seashore rocks, breakwaters, and ships.
- Appropriate guide position, weight distribution. Good casting distance even in short length. It is light and operable, so it can cast in all-night fishing without difficulty

S752UL

- It is most versatile and is available in various situations
- It is usable from the light jig head of 1g or less to the heavyjig head of about 10g.
- You can use casting balls within 10g, and you can suppressnot only dark-banded rockfish but also middle-class Koreanrockfish and Hexagrammidae.
- A model that can be used for smooth action operation without any difficulty in wrist with appropriate taper when twitching in a small minnow game

S752UL-CST | CARBON SOLID TIP

- Optimize for lift & fall, Retrieve, not action-oriented, such as hopping or twitching
- Soft Tip, soft but strong Butt. Large rockfish can be suppressed. Securing a distance to soft casting when operating a low-weight jighead
- It is also available for Vertical Beka squid Egging. White tips are highly visible, making it easier to identify Bite

S792UL

- The existing 7 late Rod was specialized for large rockfish or casting balls. It is made for jighead long distance casting using the characteristics of long rods. The strong Butt and soft Tip's characteristics show off the outstanding distance.
- It is possible to hit rockfish further away with a concise casting using the characteristics of a long but unshakeable blank

S832L

- Optimize the use of a long distance attack using casting balls and a high weight jighead Gear of 2g or more.
- Strong Butt suppresses large rockfish without difficulty, andmoderately smooth taper and resilience keep the needle fromfalling during landing.
- Born to low-water point where casting balls should be used, totarget distances, and to overpower the offshore's large rockfish.

NIXX Rocker

Rockfish Lure fishing is one of the most popular fishing genres in Korea. A fishing genre that anyone can easily catch and enjoy with light and simple gears offshore. The NIXX Rocker series is the most standardized rockfish rod developed based on pleasure(樂) and challenge and adventure spirit(ROCK).

Blank material : high elastic carbon (30t)

- Helical core + SHD. The proper fusion and optimal design of composite materials enhances Bite and riverbed sensitivity and realizes light weight and high strength

Blank mechanism

- Z-CT CONSTRUCTION(carbon tape winding) : Rockfish fishing rods are often broken because they are the lightest and most sensitive of sea rods. To minimize this situation, the NIXX Rocker series winds carbon tapes on the surface to strengthen external stress and increase torque to maximize blank power.
- SHD(super micro high density carbon) : Remove unnecessary space between layers from the laminating structure of the composites materials and reduce unnecessary resin to increase lightness and power and enhance line sensitivity

EQUIPMENT

- KIKAN's 3D "Z(ZERO TANGLE)" GUIDE system is applied and it challenges to the zero line twist in the night fishing.
- "Z" guide system improves sensitivity and casting ability and the balance of fishing rod is improved.

- Korean Hard E.V.A. Grip : durability and gripping increase
- Korean aluminum anodizing technique. Apply the saltwater coating technology.
- Reel seat: VSS rubber paint. Comfortable for repeated casting
- Low-elastic carbon tubular tips: It has both the advantages of solid and the tubular tips.
- You can cast the strongest lightweight blanks and ultra-light lures at a distance
- It is suitable for targeting various sea fish species using light lure as well as rockfish. (Beka squid, young Largehead hairtail, Jack mackerel)
- It boasts excellent sensitivity and repulsion. Strength that doesn't budge even with unexpected large targets.
- A phenomenal casting ability, you can target points that you can't easily reach.
- It has a good sense of sensitivity and excellent hookset ability even if casting a casting ball far away

732UL

- The shortest model with a focus on operability. Rod, which has the advantage of casting ball long hit specs

762UL

- The most general and standard model. Available for a variety of gears ranging from 1g to 10g. Excellent for Minnow Twitching and Zighead operations

832L

- To match the growing trend of long-distance casting every year, you can use casting balls and high-weight jighead gears of 3g or more. Models that can overpower large rockfish at all

NEW

NIXX POP ROCKER SUPERFINE ROCKFISH RODS - VER.2-

"The most popular fishing rods are not professional."

In order to break the prejudice, we have been able to analyze the problems of existing products and launch them through numerous field tests. Reinforce Butt to boost pressure, use softer tips to cope with flexibility.

Blank material : 30TON high-elasticity CARBON BASE + Helical core + Z-CT
 KOREA SAMYANG GUIDE : "Zirconia" KTSIG Guide
 FUJI REEL SEAT : VSS16 + KDPS 16P/ASH HOOD
 REEL SEAT BODY : RED COLOR Spray
 GRIP : BLACK Hard EVA GRIP

S742UL

- It is suitable for 1~6g lure operation and is the shortest model among the series focusing on operability. You can cast it exactly where you want it.

S762UL

- The most general and standard model can use various Gears from 1g~9g maximizing sensitivity by adopting tubular tips.
- Excellent in Minnow twitching and jighead operations.

S792L

- It is a model that specializes in long distance targeting using casting balls, and can be used even to a high weight jig head Gear of 3g or more.
- It can suppress to the large Dark-banded rockfish without any difficulty.

For more professional fishing

can30 ROCKER

"Lower the wall of the Lure entrance."

Rods specializing in dark-banded rockfish and small rockfish lure fishing, which is the standard for sea lure fishing, are released at reasonable prices. We have made it easy for anyone to access sea lure fishing. Rockfish lure fishing beginners were considered, and they had no shortage of merchandise such as manipulation convenience, elasticity, balance. Target : Dark-banded rockfish, Beka squid, Marveld rockfish, Hexagrammidae, medium-sized Korean Rockfish

Blank material : 24TON CARBON BASE
 GUIDE : FUJI CONCEPT "O"
 GUIDE : China's 16 spinning REEL SEAT
 Reel Seat : antislip Black rubber spray
 GRIP : Black Hard eva GRIP

S722UL

- General purpose Rod to target dark-banded rockfish, Bekasquid, and other small fish species.
- Elasticity is appropriately distributed to a short blank to have a long range.
- The elastic short blank based on 24t carbon has excellent operability, making it easy for anyone to enjoy fishing

S742L

- Develop to target offshore's large Dark-banded rockfish or mid-sized rockfish. 1.5~10g of lures can be used.
- Strong Butt is also effective for Hardbait operations including Minnow, and it is easy to control targets
- It also offers optimal performance for the most popular Largehead hairtail lure fishing in the fall

Even beginners can enjoy it!

Origin: China

TIEMCO, a Japanese fishing company, is developed optimally for fishing, and the biggest difference is in the lens.

Generally used polycarbonate polarizing lenses need to use the center of the lens to obtain the desired field of view, but the LightMaster equipped with the TALEX lens can secure a clear field of view from any perspective.

The SightMaster boasts the best polarization capability. It suppresses reflected light from the water surface during fishing, enabling sight fishing to search for structures and target species in the depth of the water. It also minimizes eye fatigue by suppressing various reflections on the front window during driving.

The SWR lens has a long water repellent effect like a differential glass coated with a water repellent. Evolve into an "ultra-water-repellent performance + strong lens" required by the angler by adding a super-water-repellent coating on the surface of the glass polarizing lens with a vacuum deposition special method.

<Performance of "super water repellent" that surpasses the existing multi-coating> During fishing, water droplets such as inevitable rain and splashing sea water are dropped to maintain a pleasant view for a long time and reduce the coefficient of friction to strongly bounce off moisture attached to the lens surface.

POLARIZED SUNGLASSES | ACCESSORIES

It is a semi-hard case and is free to store and carry.
Enjoy JOYFUL FISHING LIFE with SIGHT MASTER!

SIGHT MASTER GLASS CASE | 3P

- Morning and evening fishing: Green
- On a sunny day: Light brown
- In a wonderful daily life: Light gray

SUNGLASS RETAINER

- Flotation function to prevent loss
- Black & Yellow: Choose by taste
- Soft material: There is no sense of heterogeneity

NEW FISH TIP EYE WEAR RETAINER

- Separation protection function
- Tightening control function
- Necklace function when taking off sunglasses

NEW COTTON EYE WEAR RETAINER

- Black, blue, green, navy, yellow
- Prevent separation by tightening
- No sense of heterogeneity with soft material

GREEDY BAIT

It is made in two sizes for application to various field situations and consists of eight colors to match the colors of shrimp, anchovies, and sardines, the main prey of flatfish. The tail, which runs from a voluminous body to a sharp curve, is more flexible and constantly appeals to the target with its natural action according to the current.

UV Coating : Even with a small amount of light, it shines easily underwater

Squid flavor : It reduces the probability of short bite in sensitive situations and helps to increase the frequency of bite through olfactory appeal

Bio-salt : By improving the texture of the worm, it reduces the foreign substances. Strengthening Responsiveness to Short Bite

Reverse wrinkle design: Through reverse wrinkle design, a fine vortex is created in the water to appeal to the steady presence by waves.

Visual appeal is possible with symmetrical pintails and natural movements of the tail from the body to the soft curve.

The Korean Minnow Series, which created the entire process of motif, design, and production with its own development power over a long period of two years. (mandarin fish, masu salmon, Rainbow Trout) It is a hardbait brand designed to target stream fish species easily. It is a Minnow series that avoids OEM production methods for high-quality and high-performance products, produces them in the same way as expensive Japanese brand products through self-development, and satisfies all needs of domestic consumers.

'Match The Baits' is based on the motif of lead sack, which lives in an environment similar to that of mandarin fish and serves as the food meat, and lives in aquatic waters across the country.

KIRA 56SS (Slow sinking type)

Length : 56mm | Weight : 3.8g | Hook : VMC 1X12호

● It is used to target calm rivers or shallow places, collaborating Minnow and Crank, so it has excellent self-action even on low-speed retrieve.

KIRA 56MRSP (Suspend type)

Length : 56mm | Weight : 4.6g | Hook : VMC 1X10호

● Used to target the middle of the rapids and deep areas. In the stopping motion, the center of gravity is designed so that the head of Minnow rises about 40 degrees to induce Bite to the target fish species.

KIRA 56S (Sinking type)

Length : 56mm | Weight : 3.8g | Hook : VMC 2X12호

● Sinking Minnow, which is used in field conditions that require strong rapids and distance, and can attract target fish species with free falling actions.

소비자가 9,000원

SCOUT 65SP | Dive depth 0.5~1m | 65mm

● Weight : 5.0g / Type : SUSPEND / Hook : VMC 1X10

● It's compact size and has excellent driving distance. Balance in harmony with rolling and wobbling actions. Suspend minnow that can be used not only for scouting but also for all

소비자가 9,000원

SKID 45S | 45mm

● Weight : 3.4g / Type : SINKING / Hook : VMC 1X12

● It is possible to maintain the depth of the water when retrieve after falling to the depth of the attack. Suspend type Minnow, a new concept of sinking that can attack fish with water

SUMARI 50S (Sinking) : 50mm, 3g 소비자가 18,000원

SINKING
SUMARI 50S
Aggressive Pluggin'

- Sinking type with excellent distance and self-balance with compact size.
- Semi-Slim type. From calm rapids to strong rapids, they do not come out to the surface. It does not come to the surface not only during retrieve but also during Ripping, Twitching, and Jerking
- An all-round player who can reliably control every flow from Up to Cross to Down Stream.

SUMARI 50FS (Fast Sinking) With Owner's Hook(미늘), 50mm, 4.8g 소비자가 16,000원

FAST SINKING
SUMARI 50FS
Flat Body for Fishing

- Semi-Fat type, Fast Sinking Minnow. It boasts the strongest distance in its class and is effective in pinpoint attack. In the low depth, and the deep depth of water, it appeals to the target fish species to the free polling action and Bite is induced.
- It attracts target fish species with Minnow's own rolling action that is delivered to the hand through Rod as a unique action impact in a field with a flow velocity.
- Stay falling after switching action in less flow field. And you can use Vertical Performance, lift & fall action.

SUMARI 60SP (Suspending) : 60mm, 4.2g 소비자가 19,000원

SUSPEND
SUMARI 60SP

- Special Minnow created by combining JS Company's accumulated experience and TIEMCO's technology to target Mandarinfish and Trout.
- Optimal balance design while maintaining a stable posture that does not come out of the water even with strong rapids. It is suitable for targeting pin points with an excellent reaction speed that adopts a fixed center and produces a swimming action at the same time as launching. Angler's strong supporter with the ability to respond reliably upstream and downstream in any situation.

length : 60mm / weight : 4g / type : Sinking / recommended tackle : UL, L Rod / Line : 4-6LB PE NO. 0.4~0.8 소비자가 20,000원

NEW **Glimmer 6**

길이 : 70mm / 무게 : 5g / 타입 : Slow Sinking / 추천테클 : UL, L로드 / 라인 : 4-6LB PE 0.4~0.8호 소비자가 20,000원

- A plug exclusively for midstrawling. A downsized model based on Glimmer 7.
- A model that can increase the probability of Bite by appealing to Bass at a size of 60mm
- Like Glimmer7, the high-pitch rolling action is enormous.
- Despite the sensitive bass shortbite, it boasts a tremendous hooking rate.

NEW **Glimmer 7**

길이 : 70mm / 무게 : 5g / 타입 : Slow Sinking / 추천테클 : UL, L로드 / 라인 : 4-6LB PE 0.4~0.8호 소비자가 20,000원

- A completely new midstrawling plug that's never existed before. (Setting up for a relatively medium range of 1 to 3 meters)
- Triple hooks are installed to complement the worms Miss Bite against sensitive Bass, and developed to increase hooking rate.
- Complete rolling action after numerous trial and error. The front and tail balances were complemented for middle and bottom fishing operability.
- Perfect midstrolling plug with straightness and suction
- Even in a sensitive field that doesn't seem to have Bass at all, you can see the thrill at hand with incredible appeal.

NEW **Glimmer 7 Light**

Length : 175mm / Weight : 1.5oz (40g 클래스) / Type : Floating / Hook : # 2 / Option : # 2 깃털 흑×2, 스페어 테일 소비자가 24,000원

- Anyone can easily mid strolling around the surface layer of 10cm to 1.5m
- It's slower than the original. Bite, which has been frequent since it got into the water. It plays a special role in strict Lure control situations.
- A more detailed systematic approach is possible by distinguishing it from Glimmer 7 or Glimmer 6. Evolve into a series that can bring out more Bite chances

NEW **MB-1 CUSTOM**
175F

- "MB-1" is a remake product made of ABS. This product was produced in small quantities with handmade wood by Monkey Brain Baits in the past.
- It is designed to respond immediately to angler's roadwork.
- Various actions can be produced, from speed adjustment to turning actions that induce instantaneous Bite, irregular actions, etc.
- Mounted with 'NTD System' that sets the range of action operation of luer through simple adjustment of parts. It is possible to change the movement of the lure by changing the screw of the joint portion. By replacing it with a feather hook, various approaches are possible depending on the situation.

CICADA JUMBO

CICADA JUMBO : 60mm, 13g 소비자가 20,000원

- It has a clear appeal from the appearance of a large cicada. Excellent product that swims accurately even in slow retrieve.
- The best top water Lure beyond Buzz bait's limits.

CICADA MAGNUM BASSTUNE

CICADA MAGNUM BASSTUNED : 45mm, 6g 소비자가 20,000원

- Bass-tune version of the popular CICADA series.
- The triple hook adoption under the wing and the tail makes it easy to hook-set, and you can select colors by field in Bass-only color.

SOFT SHELL CICADA

SOFT SHELL CICADA : 40mm, 4g 소비자가 19,000원

- Lure, which is closest to cicadas, pursuing realism in form, touch, and action.
- Adopting a high buoyancy material enables clear and agile action.
- Realize real sound with the body shape of the insect's back and soft material with high buoyancy.

TINY CICADA BASE-TUNE : 34mm, 2.7g 소비자가 16,000원

TINY CICADA BASSTUNE

- Bass-only model that allows accurate casting in a small size. Instead of wings, a silicone skirt is set to suppress excessive appeal when starting sound or manipulating, attracting bass with fine vibration.
- Depending on the surface of the water state or the reaction of Bass, more detailed access is possible if used with the CICADA series.

3인치 / 6개입 소비자가 11,000원

PDL

3" ECO PDL SUPER SHAD TAIL

- A design that embodies the actual Baifish swimming.
- Action to move only the tail without moving the body. Recommended for simple retrieve and midstrolling by no sinker and Jigheadgear using offset hook.

4인치 / 6개입 소비자가 11,000원

4" ECO PDL SUPER SHAD SHAPE

- The circular body design makes it easy to use Jighead and offset hooks.
- It has a high proportion of the body, so it's good for using a no-sinker
- It appeals to the target with vibrations of tail and the sparkle of scales, and has an absolute effect, especially in Clear Water.

3인치 / 7개입 소비자가 11,000원

3" ECO PDL SUPER LIVINGFISH

- Designed to fit a specially glowing midstrolling skill
- Roll when combining the jighead and the body, and the tail vibrates finely

3인치 / 6개입 소비자가 11,000원

3" ECO PDL SUPER SHAD SHAPE

- "3D action" that we've been looking for a long time.
- Midstrolling, drop shot, trailer for small jigs, Bug-tune, etc.
- Multi-talented in various gears

Double popper 148

- If you like the original version of Whopper popper, you'll like the double popper.
- A single Lure has two reverse blades, not one, to create a double popper sound.
- It has very little floor hanging potential and the ability to overtake thick covers
- It is specialized in the burning action of scratching on the surface of the water, so it can be a fatal temptation to Bass.
- Thanks to the air-input blade, it is possible to stop on the surface of the water, allowing stop & go action.
- If you act to the fullest and stop at the pocket and move slowly or quickly near submerged trees or obstacles, the target is more likely to be caught.
- Double poppers are expected to be the most multipurpose top water Lure you have ever used.

08-BLUE BLOOD

INFORMATION

MODEL	DESCRIPTION	WT.(oz)	L.(in)	HOOK	ACTION	가격(원)
DP148	Double Popper 148	5/8	5 3/4	River2Sea Big Bite (BN) 2X Strong # 5/0	Floating	22,000

Origin: China

Whopper popper 75

- The existing Whopper popper 95/130 model focuses on powerful tail sound. And Whopper popper 75 is specialized in fast movement and the unique sound of insects when they fall into the water.
- Whopper popper 75 is effective for target fish species looking for small prey on the surface layer.

INFORMATION

MODEL	DESCRIPTION	WT.(oz)	L.(in)	HOOK	ACTION	가격(원)
WPL75	Whopper Popper 75	9/16	3	Two River2Sea (BN) X Strong Treble #4	Top water	17,000

Origin: China

Whopper popper 90/110/130

- Whopper popper 90/110/130 is a larger upper version.
- It moves by rolling resistance and can be applied to various speeds.
- Interestingly, the sound and wavelength of lifting water are better than the sound made by a metal tail.
- Use strong durability, strong wire, and unique strong 4-foot travel hook including hook hangers (strong and impact resistant)
- The 110/130 version, based on its unique powerful sound, allowed repetitive actions by throwing them exactly where they wanted to be.
- Lure's unique stop & high action is possible. It makes a strong sound and induces a larger fish in the deep to come up.
- The upper version focused on loud sound and the size 90 focused on fast action. Through this, a reenactment of a flying bug crawling on the surface of the water.
- Whopper popper 90 is effective in the high-pressure field.

It is a practical, sensuous and solid product that breaks the simple rod case frame, and can be manufactured in a variety of ways based on JS Company's molds such as circles, triangles, squares, and pentagons, and can be sized and long to facilitate movement of all rods from slim cases to large travel cases.

Ordering can be made with a specific length and design other than ready-made products, and if you want to order, the minimum quantity is at least 10, so please don't make a mistake and refer to the below. We would appreciate it if you could contact the person in charge after deciding the shape, length, design, and color in advance for smooth order production. [Please refer to the ready-made table for the thickness (size) of the case]

ROD CASE

- Breaking the circular frame and enabling original and practical forms such as triangles, squares, and pentagons
- Shoulder straps and handles are available for long distance movement
- It is possible to attach a business card stand so that it can be easily identified when traveling in a group
- Existing embroidery and other specific embroidery work is possible
- Basic color and other colors are available, and you need to contact before selection

Origin: South Korea

Stealth Kayak entered the kayak market in earnest in 1998 and has grown up overcoming leaps and limitations for all kayakers' dreams.

Starting with the manufacture of high-performance racing kayaks, it is now growing into the best fishing and recreational kayaks manufacturer. We are introducing the latest designs using CAD and CNC and products that maximize the convenience of movement using lightweight and repairable graphite materials in Korea. ((Kayak, small boat for 1~2 people) Mr. Bruce Challenor, CEO of Stealth Kayak, is a Graphite production expert who has been involved in textile glass manufacturing for more than 45 years, and his first experience was manufacturing his surfboard and boat at the young age of 16, and he actually has won several challenges on the European stage. With his rich experience and understanding of the product, he is striving for the most perfect product on the water.

POWER FISHA 14 (STANDARD)

- A one-person boat designed to be powered by a paddle or engine
- Light and versatile, giving you fantastic fun at all ages

POWER FISHA 14 (FLAT DECK)

- A one-person boat designed to be powered by a paddle or engine
- Center seats with floor hatch can be detached and attached for user convenience
- Light and versatile, giving you fantastic fun at all ages

● Notation: Camo patterns were applied to DECK EVA PADS for shipments in 2020; black pads are presented free of charge if you do not want camo designs (replacement is your own burden)

POWER FISHA 16 (FOR 2 PEOPLE)

- A two-seater boat designed to be powered by a paddle or engine.
- Light and versatile, giving you fantastic fun at all ages

● Notation: Camo patterns were applied to DECK EVA PADS for shipments in 2020; black pads are presented free of charge if you do not want camo designs (replacement is your own burden)

Here are a variety of products from "Scotty," a Canadian kayak accessory brand.

No.140 Transducer arm post adapter

It provides convenience that you don't have to attach a sonar by punching a hole in the kayak, so it's easy to detach and store separately after the kayaking.

소비자가 40,000원

No.141 Transducer Arm Gearhead

Scotty accessories such as rod holders, camera mounts, and cup holders are easily and quickly installed, allowing you to adjust the angle you want with a ball mount, and firmly fix the product.

소비자가 52,000원

No.162 Transducer arm gearhead adapter

Scotty accessories such as rod holders, camera mounts, and cup holders are easily and quickly installed, allowing you to adjust the angle you want with a ball mount, and firmly fix the product.

소비자가 62,000원

No.163 Fishfinder plate

Universal style fishfinder mount. Most fishfinder with 5 inches or more can be installed. Front, back, left, right angles can be adjusted.

소비자가 62,000원

Component : #241 deck mount (mounted on flat deck surface or on the side of the boat or trans island)

No. 276 Anchor lock system

The Scotty Anchor Lock is designed for use with one hand. The anchor can be easily raised and lowered with rollers and locks.

소비자가 55,000원

No. 279 Bait casting spinning rod holder

A device capable of additionally mounting a Bait rod (not provided with a mount)

소비자가 27,000원

Baitcaster 내부직 : 1.30"
마운트 크기 : 2.4" X 2"
차수 볼트 : 1.5/16" X 3/16"

No. 280 Bait spinning rod holder

Rod equipped with Bait Reel/spinning reel can be mounted on the cushion holder. With the rod mounted, you can freely adjust the mounting direction up, down, left, and right.

소비자가 36,000원

No.302 Stabilizer outrigger

With Scotty Kayak Sterizer, you can withstand more than 13kg of buoyancy and minimize kayak shaking to maintain a stable posture in fishing.

소비자가 430,000원

No.229 Power Lock Rod Holder

It can be mounted on kayaks and ships, provides strong tension among Scotty's rod holders, and safely mounts the rod by turning the lock on the front. (Side deck mount is not included)

소비자가 31,000원

No.230 Power Lock Rod Holder

It can be mounted on kayaks and ships, provides strong tension among Scotty's Rod holders, holds all reel styles, and rotates the lock on the front to safely process the rod. (The side deck mount is provided by default)

소비자가 40,000원

No. 257 Triple mount

Three holders or mount are available

소비자가 75,000원

No. 259 Rod holder extender

You can raise the holder's position by 17cm

소비자가 24,000원

No.311 Drink holder

Multipurpose cup holder (without mount and whistle)

소비자가 27,000원

Poly Marine Glue Stabond UK-148, HH-66(RH) 접착제 등과 같은 보트용 접착제를 사용하여 부착 가능

No.341 Inflatable mount pad

Inflatable kayak, fixed adhesive mount to allow use of Scotty rodholders on boats

소비자가 19,000원

크기 : 3/4" 직경
차수 볼트 : 2.3/16" X 2.3/16"

No.344 ROUND FLUSH DECK

All scotty's holders and extenders are available.

소비자가 19,000원

No. 349 RODMASTER II NO MOUNT

Scotty Rod Master2 Rodholder (No Mount)

소비자가 28,000원

No. 260 Fly rod holder

A device capable of mounting a fly rod

소비자가 37,000원

No. 266 Float tube adapter

Required when mounting the #241 mount to the float tube. Quick and easy installation and removal.

소비자가 36,000원

No. 267 Fly rod holder/float tube mount

Combined with a fly rod holder and a mount-adjustable wrap around for float tubes, the fly rod holder can be used for float tubes or pontoon boats.

소비자가 70,000원

No.269 Swivel Fishfinder Mount.

as LOWRANCE and HUMMINGBIRD, fast attachment and angle adjustment.

소비자가 34,000원

Rodmaster II Interior Diameter: 1.85"
Mount Dimensions: 4" x 2" x 2"
Bolting Dimensions: 1.5/16" x 3.3/16"

No.350 RODMASTER II WITH SIDE DECK

It is a rod holder with enhanced strength and elasticity with nylon synthetic fibers and is provided with movable gimbal pins.

소비자가 37,000원

No.368 UNIVERSAL SOUNDERFISH FINDER MOUNT

It is compatible with all fishfinder, and has convenience and durability that does not require changing the mount separately when changing models.

소비자가 29,000원

Poly Marine Glue Stabond UK-148, HH-66(RH) 접착제 등과 같은 보트용 접착제를 사용하여 부착 가능

No.415 SLIP DISCS

Fine adjustment for all scotty holders and mount/arm/holder. Fastening between the holder and the mount enables a desired angle and fine adjustment.

소비자가 8,000원

No.429 Gear head mounted extender

Scotty mounts and rod holders are compatible, designed with a two-bar joint structure, adjusted the height and angle of the desired rod holder or bait board, and can be used efficiently in space.

소비자가 49,000원

More product information can be found at JS Company Mall (www.jscompanymall.net)

Here are a variety of products from "Scotty," a Canadian kayak accessory brand.

No.433 COAMING GUNNELCLAMP MOUNT

It is easy to adjust the angle, and since it is fixed using a clamp, it is fixed firmly and can be used stably. (Basically including gear head mounts)

소비자가 45,000원

No.438 GEAR-HEAD TRACK ADAPTER

Mounts that can be easily mounted without a kayak hole or screwing to use a track rail or scottie slide track on the hull.

소비자가 26,200원

No. 439BK-8 Scotty Slide Track(8inch)
No. 439BK-16 Scotty Slide Track(16inch)
No. 439BK-24 Scotty Slide Track(24inch)

(사이드 슬라이드 트랙 어댑터 및 로드 홀더는 미포함)

High-quality black tracks can be installed on kayaks, canoes, and small boats. The track is equipped with a 438 gear head-track adapter and a rod holder for fishing.

8" 소비자가 10,000원
16" 소비자가 15,000원
24" 소비자가 21,000원

No.444 COMPACT THREADED DECK MOUNT

It is easy to mount on kayaks by screw method, and all holders and extenders can be mounted. Close the cover to prevent foreign substances from entering.

소비자가 19,000원

No.455 Bait board

It can be operated by mounting fishfinder, cupholder, camera, and equipment. Convenient work such as hook or lure replacement.

소비자가 39,000원

No.459 Rod holder extender

The position of the rod holder can be adjusted and expanded by 17 cm.

소비자가 28,000원

No.476 Rod holder mount set

Composed with side/deck mounts

8" 소비자가 36,000원

No.479 Rocket Launcher Roadholder

Rocket Launcher Rod Holder (No mount provided)

소비자가 28,000원

No.590 Snap hook

It is made of plastic and can be used semi-permanently without corrosion (bulk)

소비자가 2,500원

A strong incandescent lamp
Two AA batteries(Use it for up to 8 hours)
#241 Deck Mount included
20" pole and light included

No.823 Sea light lamp

Safety lamp (2 miles out identification). Anti-corrosion, waterproof support.

소비자가 87,000원

42" high pole
3M reflective tape finish.

No.828 Sea light lamp/Flags

Lamp/flag(orange, location notification)

8" 소비자가 130,000원

JSCOMPANY, OFFICIAL AGENCY IN KOREA

KOREA The famous brand designated by JS Company as an official agency in Korea

We will always try to make you happy with the product and enjoy the joy of fishing.

CAUTIONS WHEN HANDLING THE PRODUCT

precautions for handling products

Rod

ELECTRIC SHOCK CAUSED BY CONTACT

- Be careful of electric shock by contact at places such as high-tension lines, tracks, and iron bridges.

ELECTRIC SHOCK CAUSED BY LIGHTNING

- In an environment at risk of lightning, never catch it and immediately get away from the fishing rod and evacuate to a safe place.

CAUTION FOR SAFETY ACCIDENTS WHEN CASTING

- Take a look at the surroundings and be safe. Fishing needles can cause people to stab or get caught in objects, causing damage to rods.
- When casting in a state where the line is tangled (guide, reel, etc.), it causes damage.

WHEN THE LINE CAUGHT

- Do not shake the rods forcibly when the line is caught in the underwater obstacle. There is a risk of breaking the rod or getting hurt by Gear flying. Pull the string as much as possible by hand and cut it off. At this time, the hand can be cut on the line, so use gloves or towel to protect your hand.

SEPARATION METHOD IN THE FIXATION

- When the connection is not separated, apply nonslipping preparations to both sides of the connection, or put on a rubber sheet, etc., and hold both sides of the joint and rotate in the opposite direction to release the connection. Never hold the guide and turn it around. If you give it a force at a time, your hand can be caught in the connection of the rod and you can get hurt.
- For joint-type fishing rods, the interval is preset for each node when combined; this is not a fault, so do not push it overly. If you push it more than necessary, it will cause fixation and there is a risk of damage.

PRECAUTIONS FOR DAMAGE AND HANDLING

- Be careful when carrying or handling to avoid a strong impact on the Rod, such as hitting or dropping hard or angular objects.
- Don't raise your fishing rod too high or hold the middle of the fishing rod and pull it out; don't swing it in the air.
- If the rod is damaged during use, be careful that your hands may be injured in the damaged area.

HOW TO WASH AND STORE AFTER USE

- After use, wash the surface dirt or salt with lukewarm water
- Remove moisture, then remove the moisture completely from the shade
- Foreign substances that are not well cleaned with water are effective if you wipe them with a soft sponge buried with kitchen detergent.
- If the wet rod is left closed in the car trunk or case, the painted part is peeled off or the metal part is corroded.

Clothing

WATERPROOF

- Please be sure to wash your hands; excessive stimulation may cause problems such as damage to the cloth, deterioration of waterproof function, and waterproof sealing when using the washing machine.

INCLUDING BUCKLE, ZIPPER ETC

- Excessive irritation by the washing machine, dehydration, or use of a dryer can cause accessories to fall off or damage to the fabric.

SEE CARE LABELS FOR EACH CLOTHING

- It is recommended to refer to the care label attached inside each clothing and wash it.

MANAGEMENT METHOD

- After washing, dry it sufficiently in a cool place out of direct sunlight and store it.
- When clothing is left wet, it can cause damage to the fabric, migration, and bleaching.
- In the case of clothes with waterproof function, it can cause coating damage and wear of waterproof fabric when stored in a folded state for a long time.

Polarized
Sunglasses

WATCH OUT FOR VISION DISTORTION, HEADACHES, AND DIZZINESS

- Please be careful that it is caused by distortion of vision, headache, dizziness, etc. by curvature when installing a third party lens instead of an existing product.
- Sometimes the lens or frame is deformed or damaged by heat; do not store in a car or in a hot place in hot weather.
- ▶ After use, rinse with the flowing water, wipe off the water with a soft cloth and store it.

Life Jacket

SOLID LIFE JACKET

- Please wear it correctly according to how to use the product manual. Failure to wear properly can lead to problems with functionality.
- Check wearable weight and minimum buoyancy to determine whether or not you are available and use it.
- When washing, follow the handling manual. Washing methods that go wrong can cause buoyancy decline.

INFLATABLE LIFE JACKET

- Before use, check the internal tube fabric and sewing fabric for defects, and the condition of the expansion operating kit before using.
- Please wear it correctly according to the contents of the manual.
- Please refer to the handling manual when washing and refrain from washing the whole part.
- Storage in a humid place may malfunction by the moisture detection sensor, so keep it in a dry place as much as possible.

AFTER SERVICE REGULATIONS

Product (Rod) after-sales service regulations

01

GROUNDS FOR DAMAGE COMPENSATION

Consumer damage compensation regulations announced by the Ministry of Finance and Economy

02

JSCOMPANY FISHING RODS ARE COMPENSATED ACCORDING TO THE COMPENSATION STANDARDS FOR EACH PRODUCT BELOW.

1절 낚시대

- ① One time within the warranty period, 25% of the cost to the consumer, exchange for a new product
- ② After the warranty period, the customer pays 50% for one time, exchange for a new product

2절 낚시대

- ① One free replacement within the warranty period (limited to the relevant section)
 - ② Tip part after the warranty period: 40% of the cost of the consumer, exchange for a new product
Butt part: 60% of the consumer price exchange for a new product
- ※ Exception: Products under KRW 95,000: Customers exchange 20% of tips and 30% of butts once within the warranty period
 ※ However, it is limited to the relevant section and in case of multiple sections, it is applied according to the company regulations.

지깅(Butt 분리형) 낚시대

- ① One free replacement within the warranty period (limited to the relevant section)
 - ② Tip part after the warranty period: 60% of the cost of the consumer, exchange for a new product
Butt part: 40% of the cost of the consumer, exchange for a new product
- ※ Exception: Products under KRW 95,000: One time within the warranty period, the customer bears 30% of the tip, 20% of the butt, exchange for a new product

절번	1	2	3	4	5	6	7
2절	40%	60%					
3절	25%	35%	40%				
4절	20%	20%	25%	35%			
5절	10%	15%	20%	25%	30%		
6절	10%	10%	15%	20%	30%		
7절	7%	9%	10%	12%	15%	17%	30%

03

THE WARRANTY PERIOD IS WITHIN ONE YEAR FROM THE DATE OF PURCHASE, AND ANY ADDITIONAL A/S WILL BE CHARGED..

04

THE FOLLOWING CASES ARE EXCLUDED FROM WARRANTY PROCESSING.

- A/S due to loss of damage number and loss of fishing rod
- Defects in the product due to arbitrary modification or repair
- In case the product is defective due to consumer negligence (damage caused by activities other than fishing)
- In case of damage to the product due to natural disaster or product defect due to a corresponding disaster

05

PLEASE DO NOT BE MISTAKEN AS THE ROUND-TRIP TRANSPORTATION COST INCURRED DURING A/S IS THE RESPONSIBILITY OF THE CONSUMER.

- Address: 22, Samjak-ro 144beon-gil, Bucheon-si, Gyeonggi-do (85-1 Nae-dong, Ojeong-gu, Bucheon-si, Gyeonggi-do)
